About Us !

Art-N-Glass founded since - 1986 has become a renowned name in almost all verticals related to glass with highly skilled more than 1200 staff members - everything from decorative mirrors to insulated glass, and from glass sinks to glass furniture. Their infrastructure, in the hands of the highly skilled technicians, has made it possible for us to provide glass products of unmatched quality. Our design department, with their constant innovation and R&D, ensures that any kind of glass processing that can be visualized by you, can be realized by us. They have the highest quality control certification (ISO9001:2008), ISI-2553 and systems in place to ensure that all processes, including cutting, edge polishing, toughening, laminating, insulating, water jet cutting, shape cutting, beveling bending etc.

Green Fenestration is one of the most advanced and high-tech manufacturer of world class uPVC Doors and windows in India. We have state-of-the-art fenestration set up with German and Italian machinery. Our technical staff has a global experience and exposure. We are regularly updated and trained by our German suppliers in new products, technology and manufacturing process.

Stained Glass

Stained glass is a type of decorative glass that has been colored, painted, or stained with various metallic salts and other pigments. It is often used in architecture, particularly in windows, to create beautiful designs and patterns that let light pass through.

Stained glass has a long history, with the earliest known examples dating back to ancient Roman times. However, it was during the medieval period that stained glass began to be used extensively in the construction of churches and other religious buildings. The use of stained glass in this context was largely due to its ability to convey religious stories and messages through visual art.

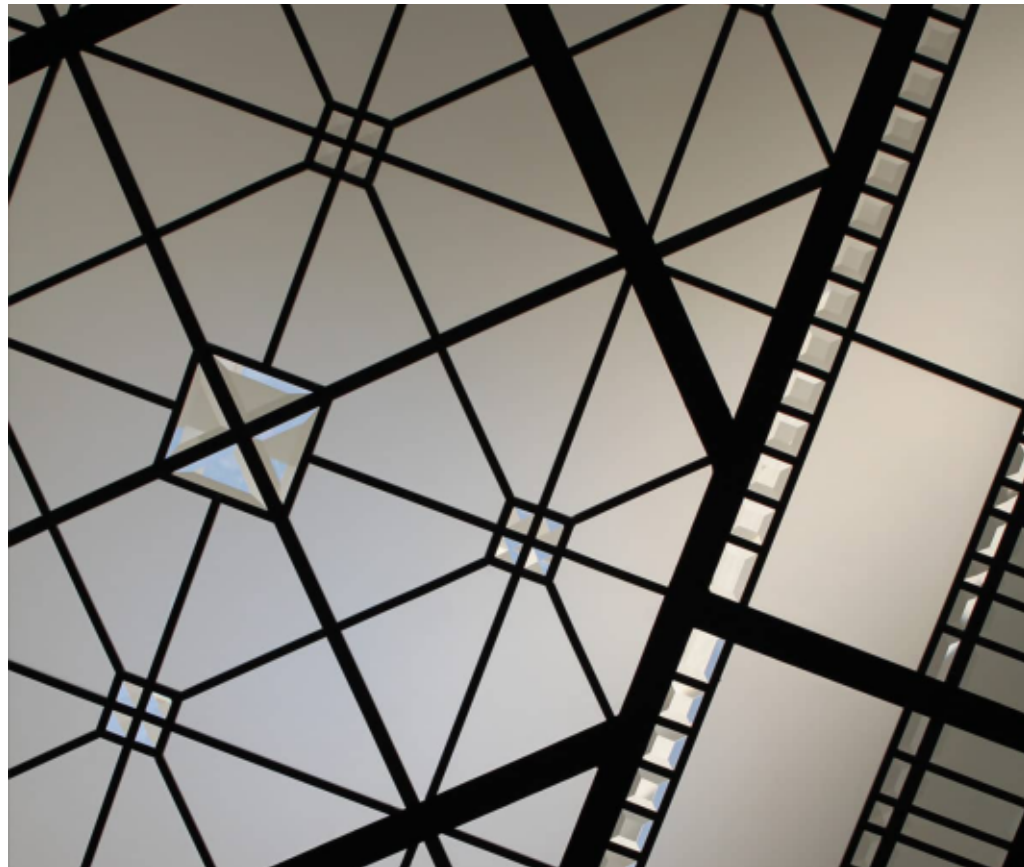

During the Renaissance, stained glass fell out of favor somewhat as other forms of decorative glass, such as painted glass, became more popular. However, it experienced a resurgence in the 19th century, particularly in the Art Nouveau and Arts and Crafts movements, and has remained popular ever since.

Creating stained glass involves several steps, including cutting and shaping the glass, painting or staining it, and then assembling the pieces using lead strips or other materials. The result is a beautiful piece of art that can be enjoyed for generations.

Architectural Art Glass Ceilings

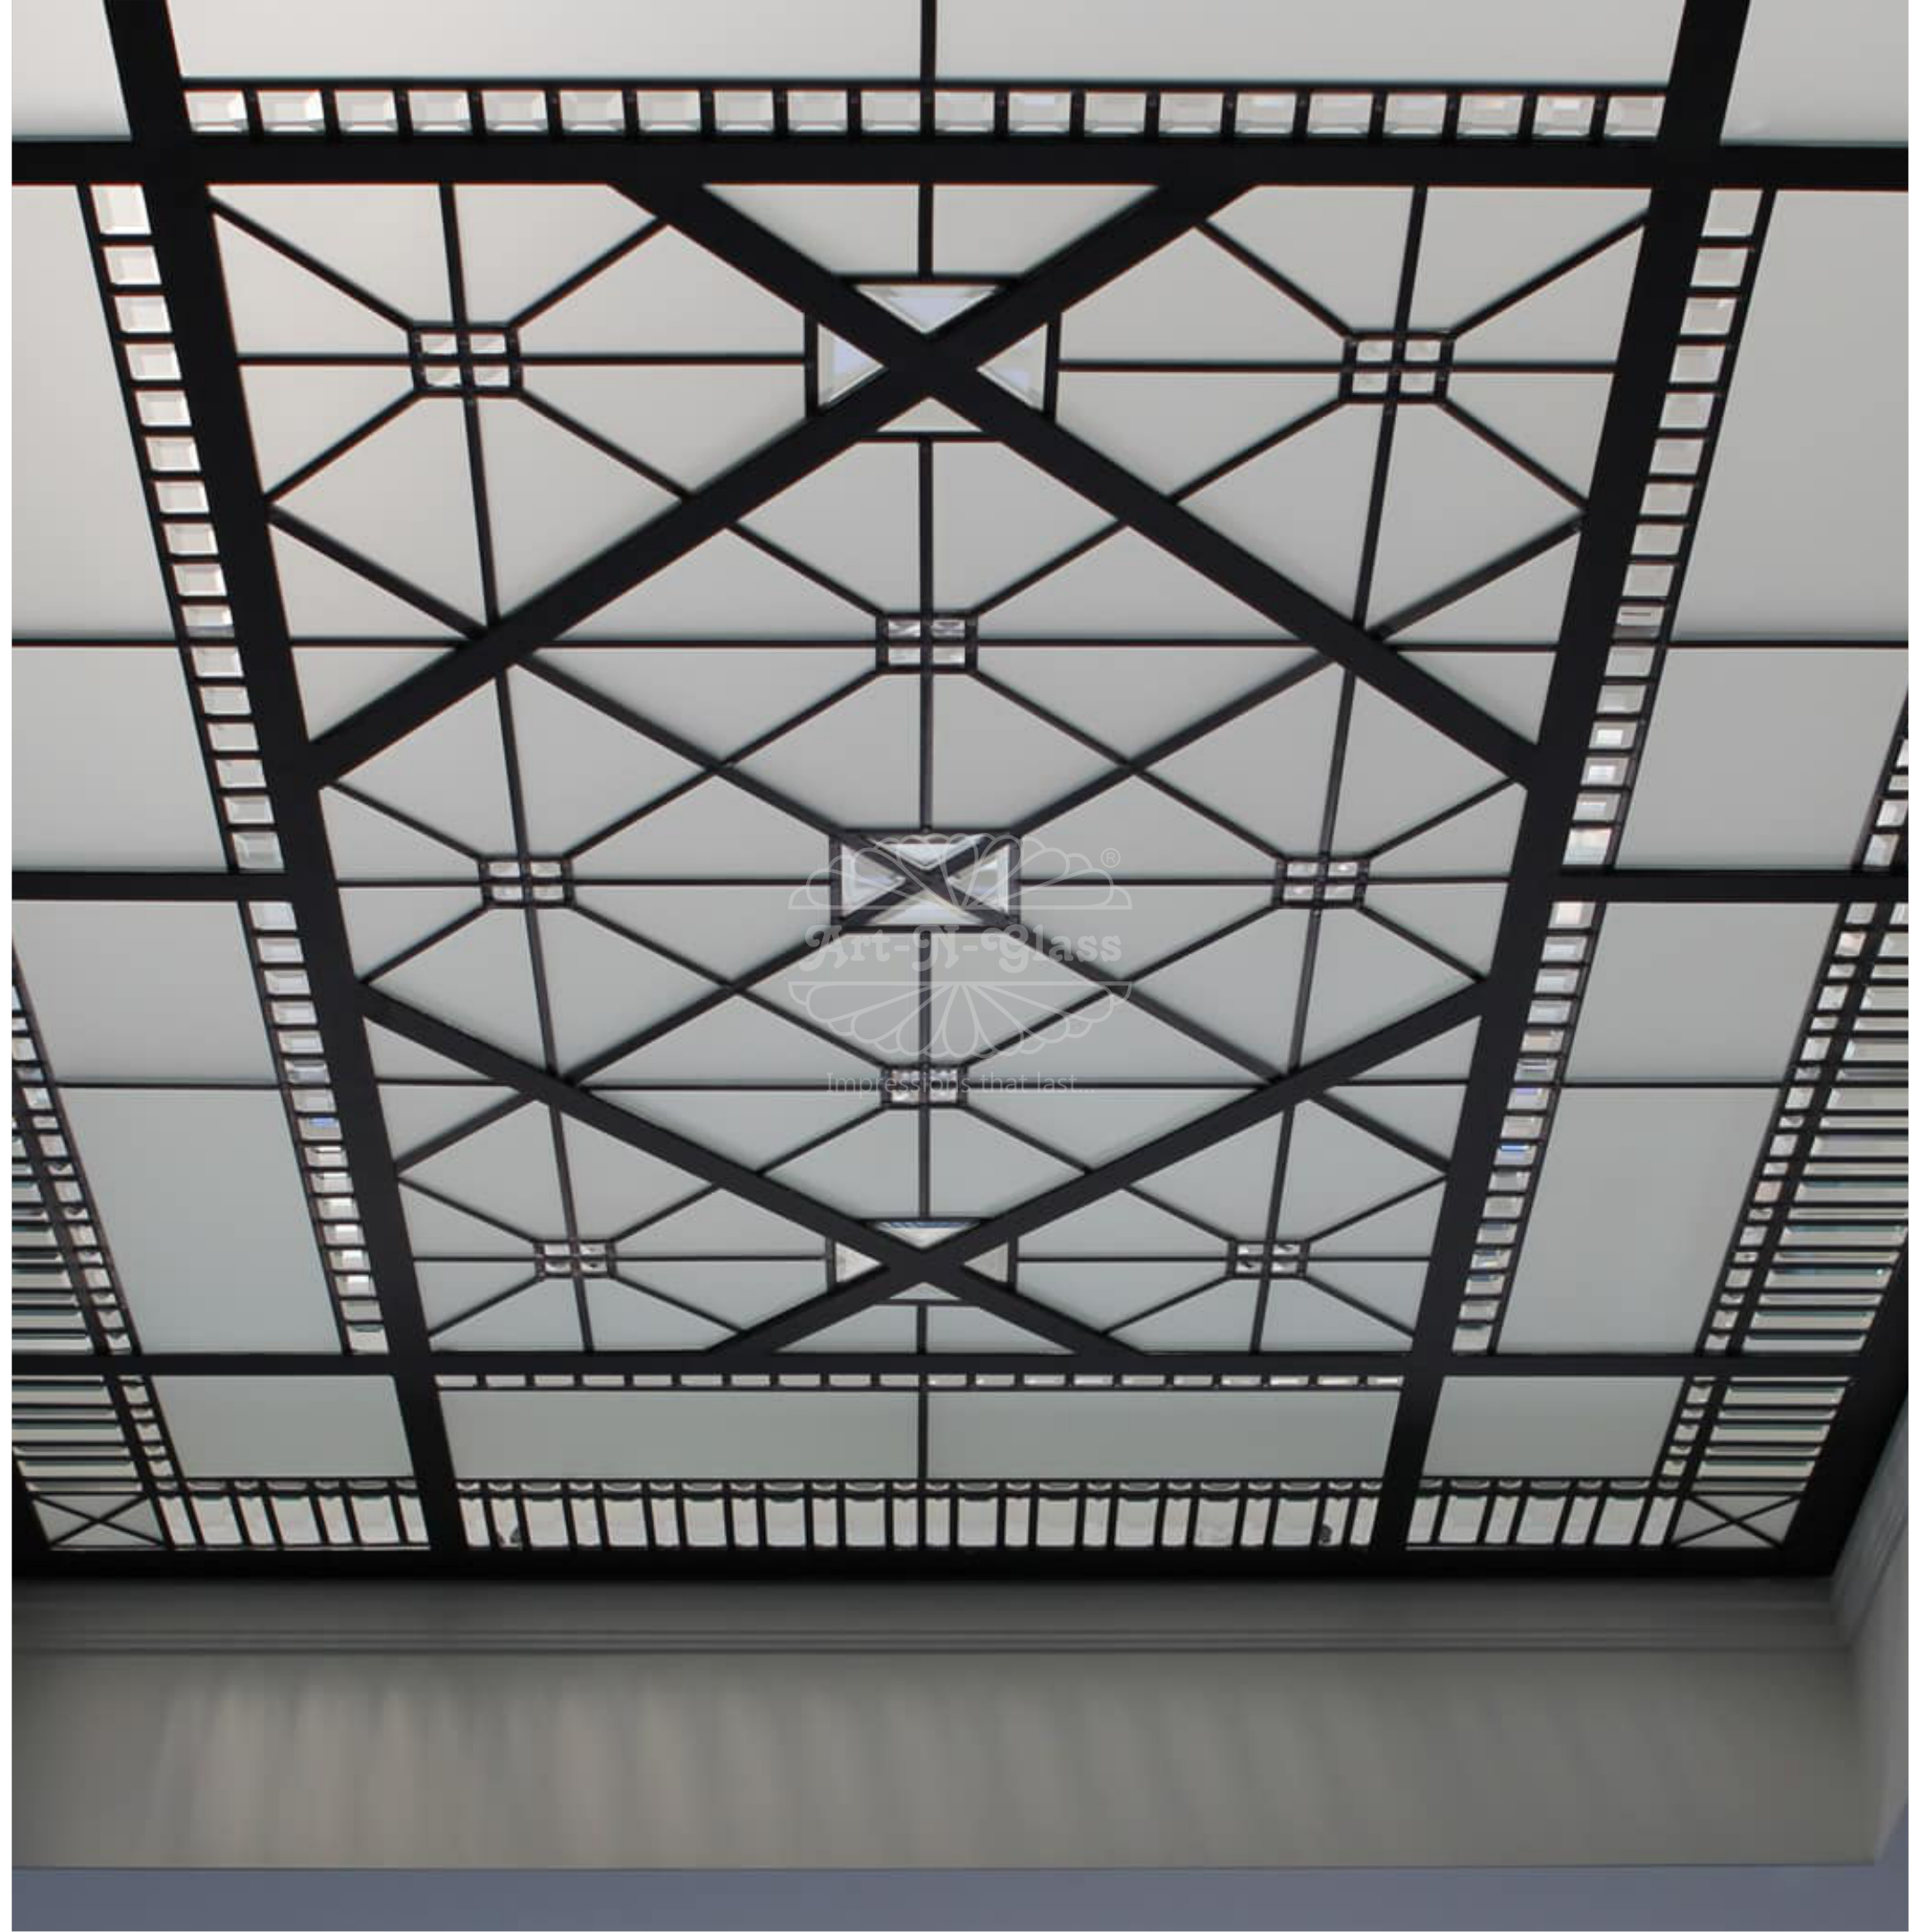

Small Ceilings

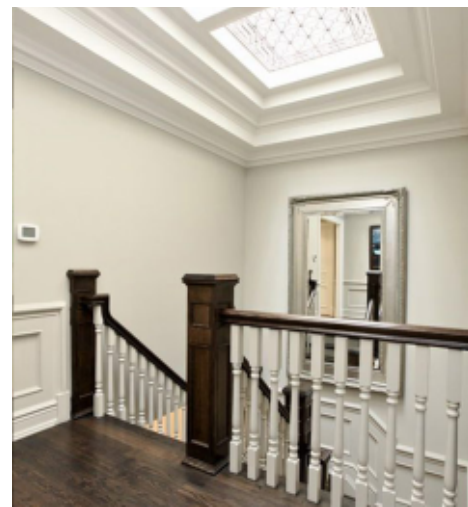

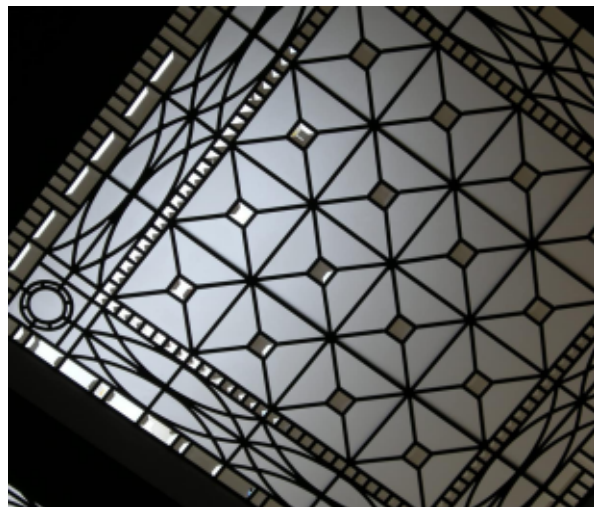

Small bathroom leded glass skylight

Larissa

The master bathroom of a custom-built home in Toronto was given a tiny bathroom leded glass skylight ceiling in a traditional style with clear bevelled glass and acid-etched glass to offer character and ambient light. The bevelled glass components transform light into an incredible spa-like experience when exposed to direct sunlight. For the same client, we also erected a sizable oval skylight made of leded glass and stained glass.

Decorative stained and leaded glass skylight ceiling

Hogg's Hollow Trinity

A decorative skylight ceiling made of leaded and stained glass is located above a stairwell in a Toronto custom-built home in Hogg's Hollow. The Georgian period's straightforward, classical geometric pattern served as inspiration for the beautiful ceiling design.

Classic oval leded glass dome lay light

Aurora Gleam

A traditional oval dome lay light in leaded glass was specially created for the corridor of a residence in King City. The artistic glass ceiling, which is constructed entirely of transparent textured art glass, bevelled glass, pale bronze glass, and clear crystal jewels, is elegantly framed by lovely plaster mouldings and a multi-level dome elevation etched into a rectangular opening.

The traditional crystal cut glass pattern of the rosette piece served as the design inspiration for the oval leaded glass dome. The interior of the house is illuminated in a lovely way by the artistic glass ceiling that was constructed beneath the roof skylight thanks to a variety of rich glass effects.

We got the opportunity to construct modern kiln-cast art glass with a minimalist pattern using light lilac, pink, and amber for the same client.

Oval stained and leaded glass dome ceiling
Tri-City

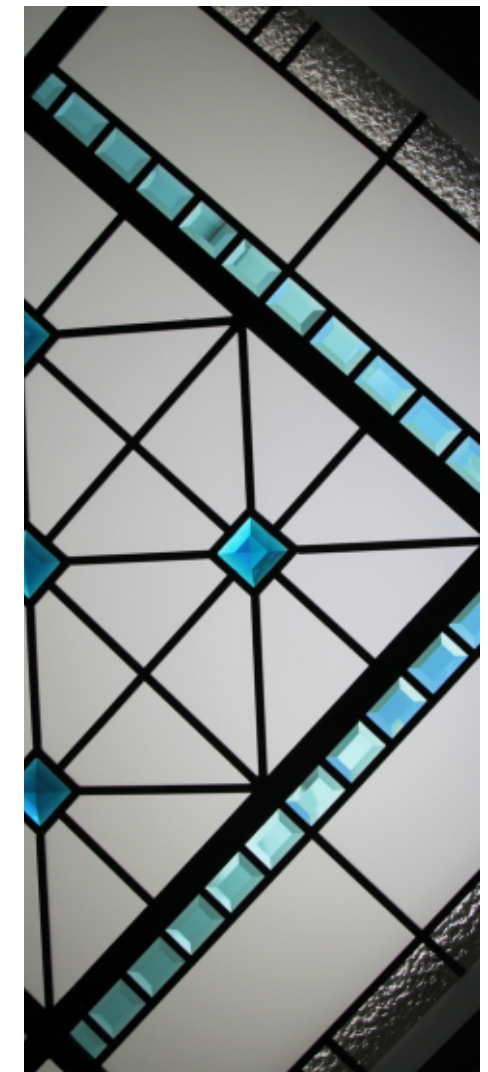

Natural light is provided in the most aesthetically acceptable manner by an oval stained and leaded glass dome ceiling with crystal chandelier for an oval stairway. For one vast living area, two elegant glass skylights were created. To add intrigue and adventure to the clients' experience, it was intended to design and construct ornamental glass ceilings that were slightly different in approach and design. To provide natural light to the area below, a sizable square skylight made of stained and leaded glass was erected above the double-height great room. The elaborate elliptical staircase was intended to be crowned by the transparent ellipse stained and leaded glass skylight.

Small square stained and leaded glass skylight Silver Point

The historical building in downtown Toronto was created with a modest square Neo-Gothic stained and leaded glass skylight roof with accent jewels to offer character and ambient light. The client expressed interest in the Gothic design of substantial older cathedrals in Europe. We chose the stunning ceiling of Peterborough Cathedral in the United Kingdom as our source of inspiration (the Cathedral Church of St Peter, St Paul and St Andrew).

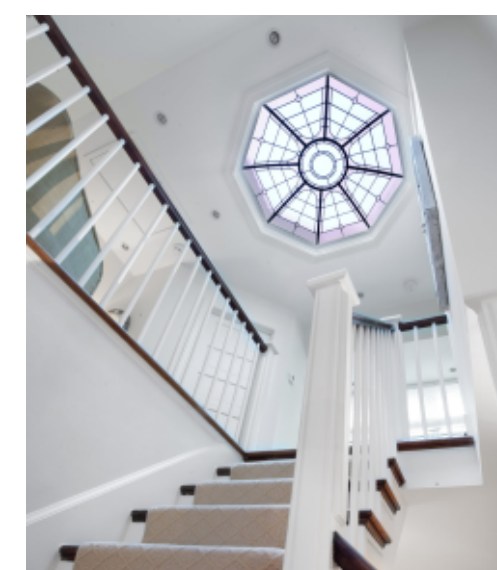

Small octagon stained and leaded glass skylight Little Turquoise Gemstone

The corridor is illuminated by a small octagon-shaped stained and leaded glass skylight ceiling with accent turquoise crystal jewels and hand-bevelled glass. The traditional homes in Great Britain served as inspiration for the elegant glass ceiling lay light. The design for the stained and leaded glass skylight was created using hand-beveled turquoise glass and a straightforward geometric pattern. For the same client, we designed a double-height great room with a massive square stained and leaded glass skylight, an oval stained and leaded glass dome, and an oval staircase.

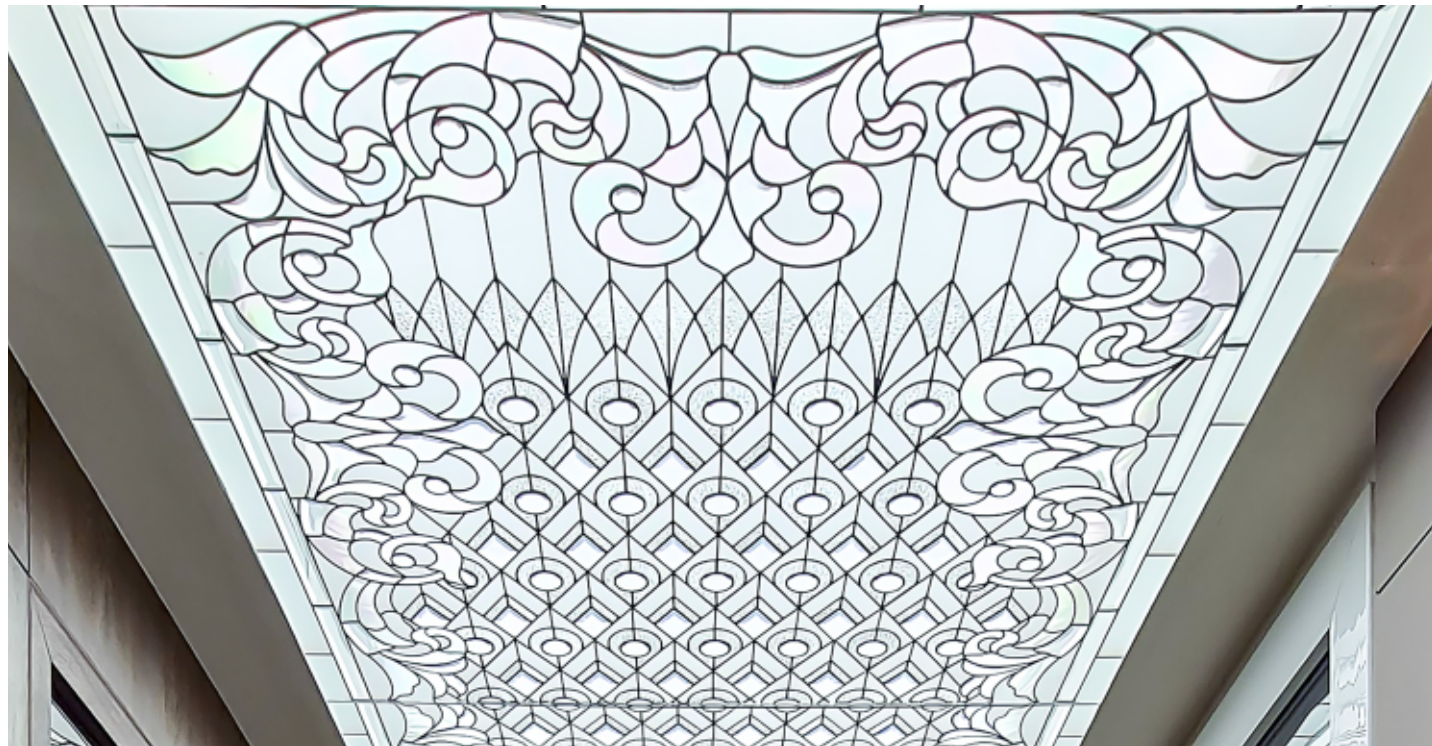

Simple stained and leaded glass octagon Bethesda

The skylight that was built above her top-floor landing is being admired by political consultant Mildred Webber Holmes. It gives the upstairs a Tiffany lamp-like appearance. "I adore it," she exclaims. It replaced "a muted, dull skylight that let in virtually no light—horribly unattractive yellowish plexiglass. The sky was obscured to us. Holmes and her husband Chris hired Anthony Wilder of Anthony Wilder Design/Build in Cabin John to redesign the skylight as part of a third-floor makeover six years after purchasing their house in the Wesley Heights neighbourhood of Upper Northwest D.C. Although though he wouldn't ordinarily advise skylights in historic homes, especially in the front of the house, he made a suggestion that they be installed in the guest room, bath, and sitting area.

Small square stained and leaded glass skylight Silver Point

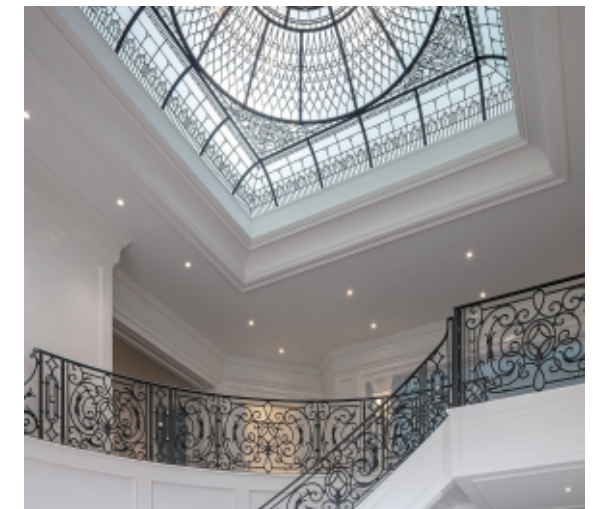

The historical building in downtown Toronto was created with a modest square Neo-Gothic stained and leaded glass skylight roof with accent jewels to offer character and ambient light. The client expressed interest in the Gothic design of substantial older cathedrals in Europe. We chose the stunning ceiling of Peterborough Cathedral in the United Kingdom as our source of inspiration (the Cathedral Church of St Peter, St Paul and St Andrew).

Ceilings

Vaulted & Domed

Large stained and leaded glass domed ceiling

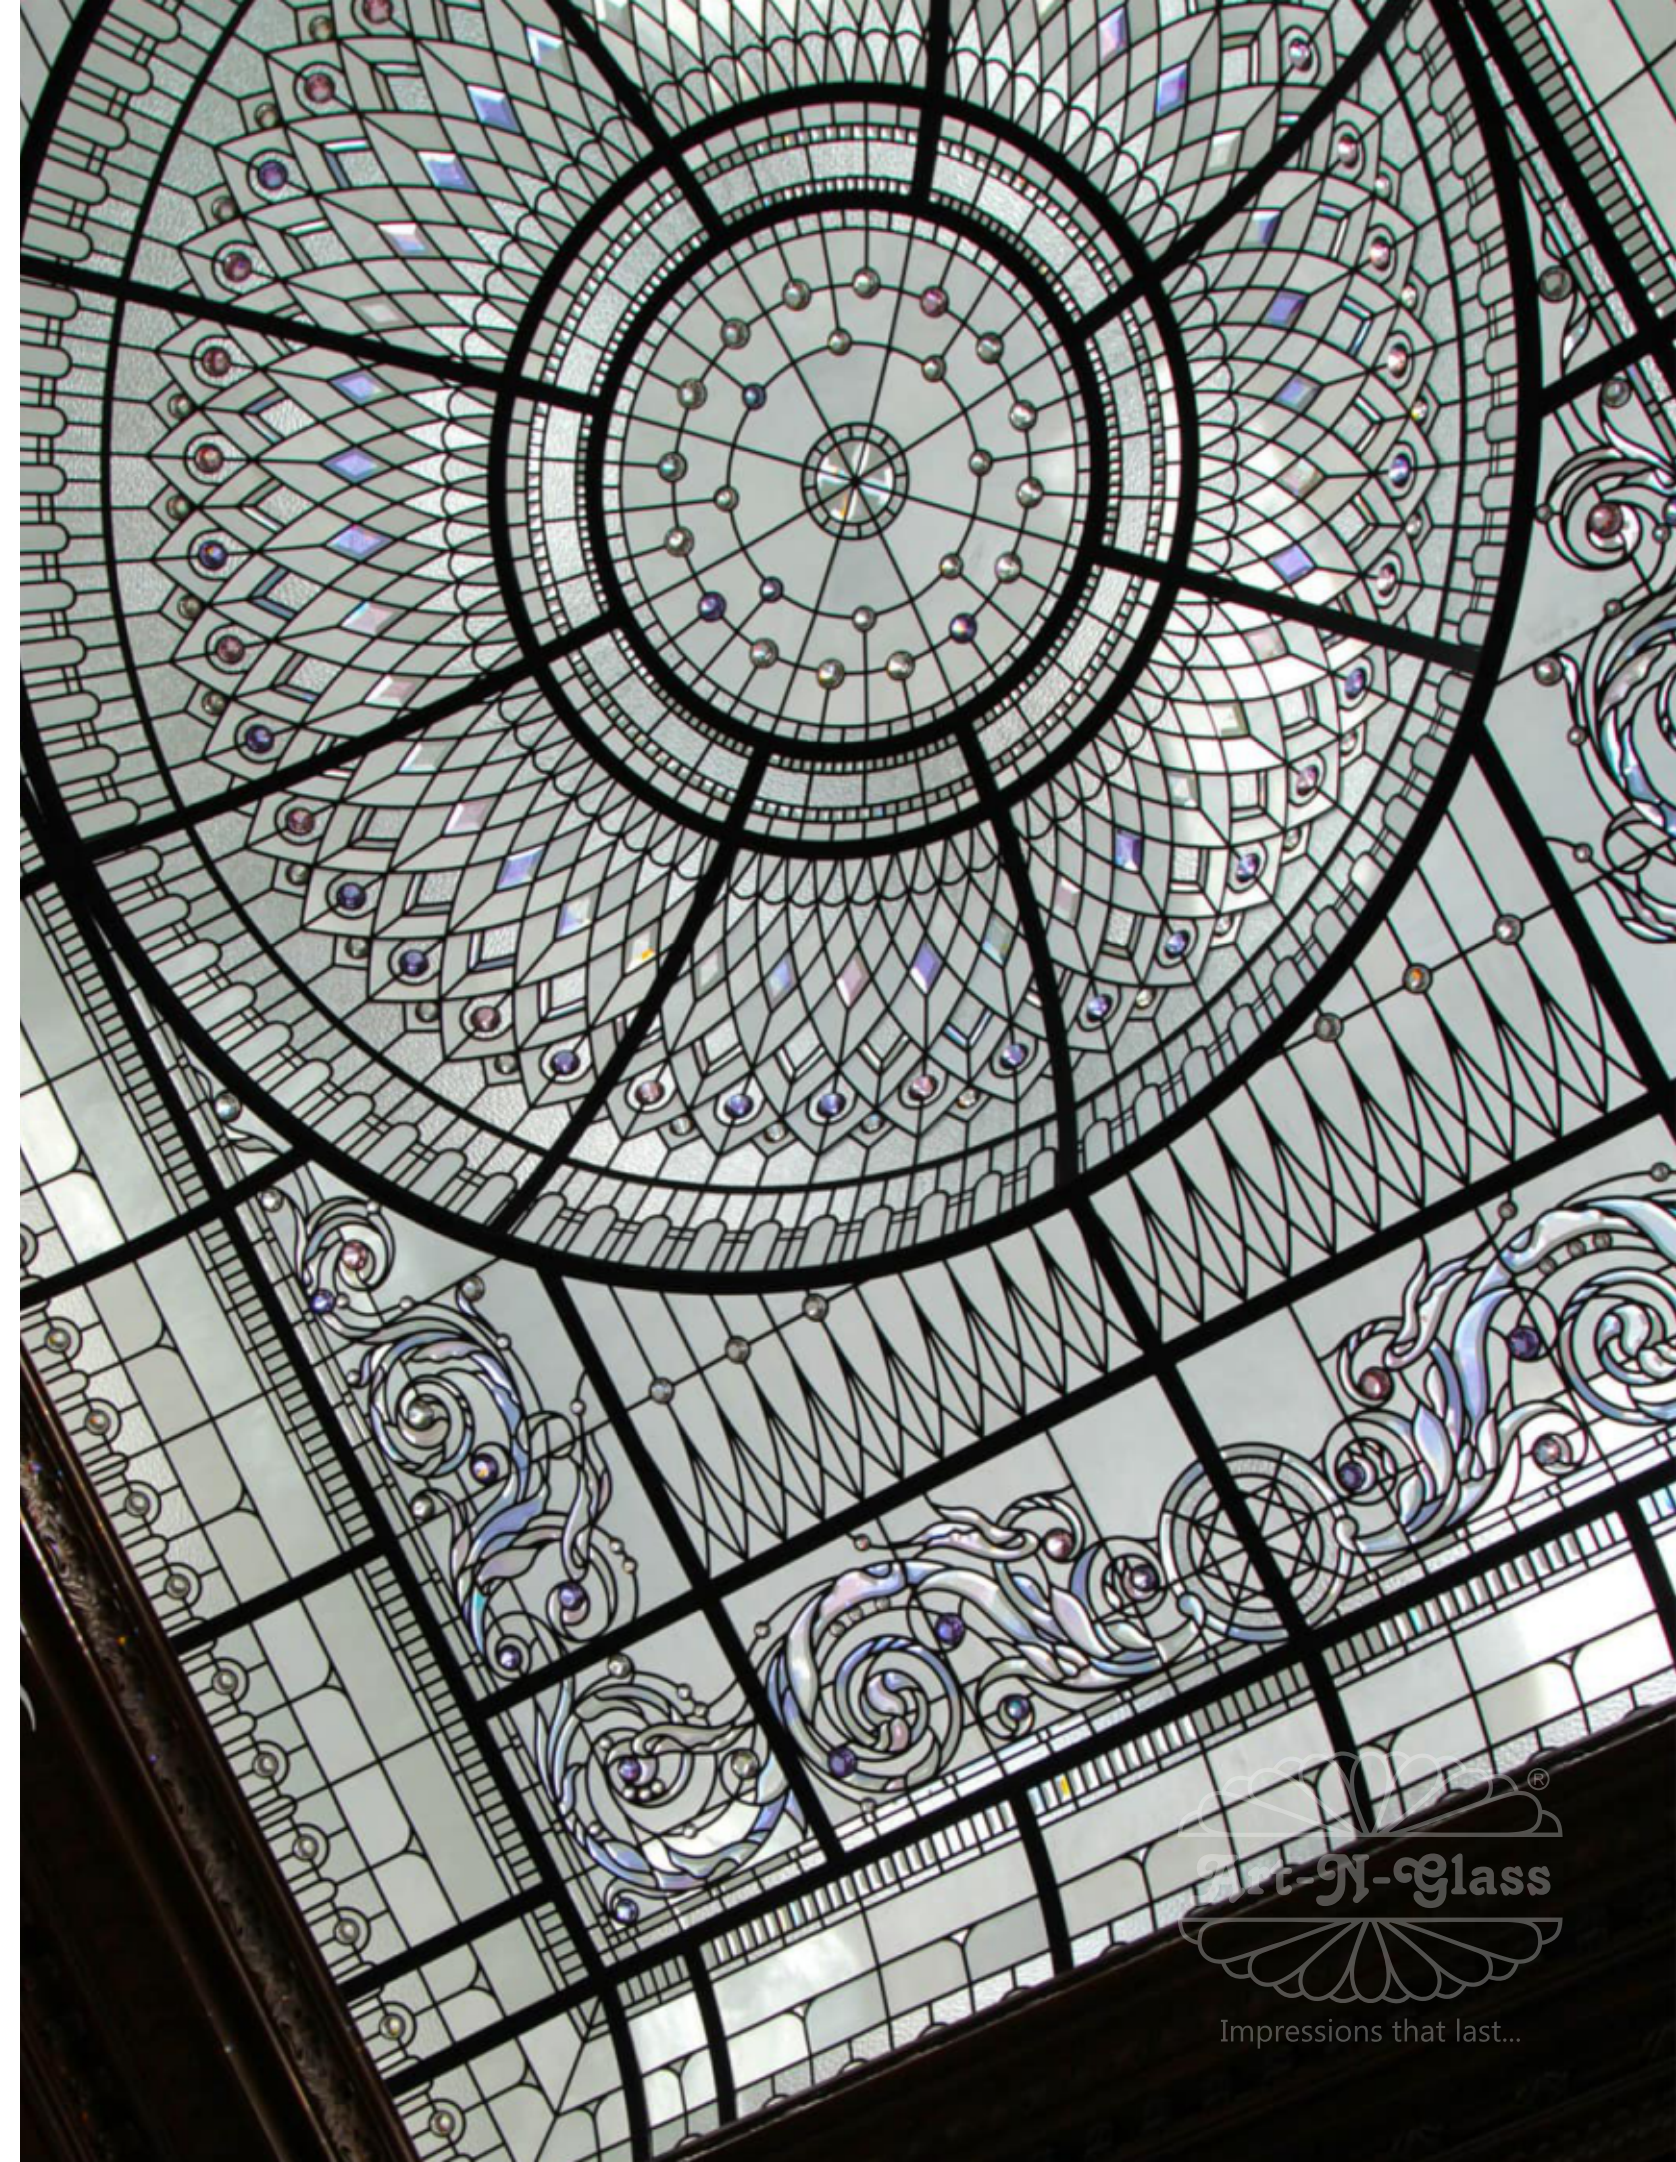

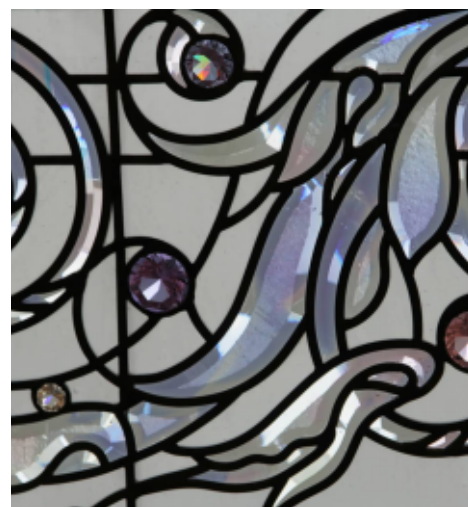

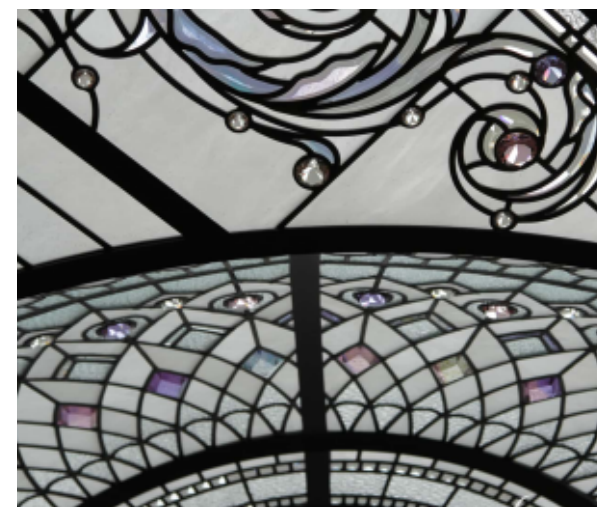

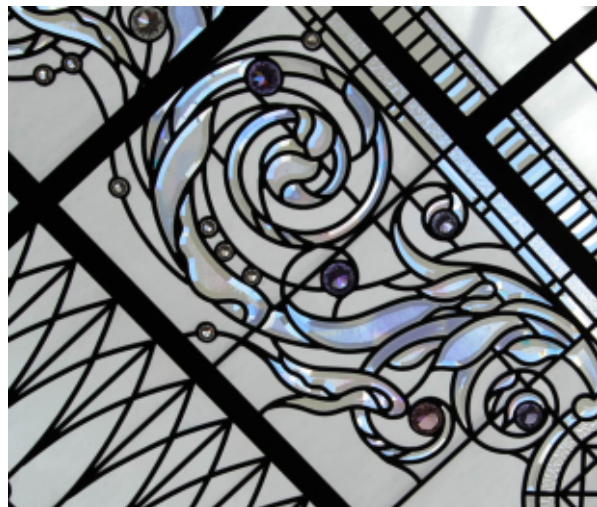

Sky High

Once upon a time, a client asked us to create a huge stained and leaded glass domed ceiling that would be so stunning that everyone would pass out upon seeing it. Hundreds of individually hand-bevelled glass and crystal diamonds of various sizes were used in the ceiling design I created. The dome offers visitors a really special experience because it is quite rich in different glass effects.

Residential stained and leaded glass dome ceiling

New Haven

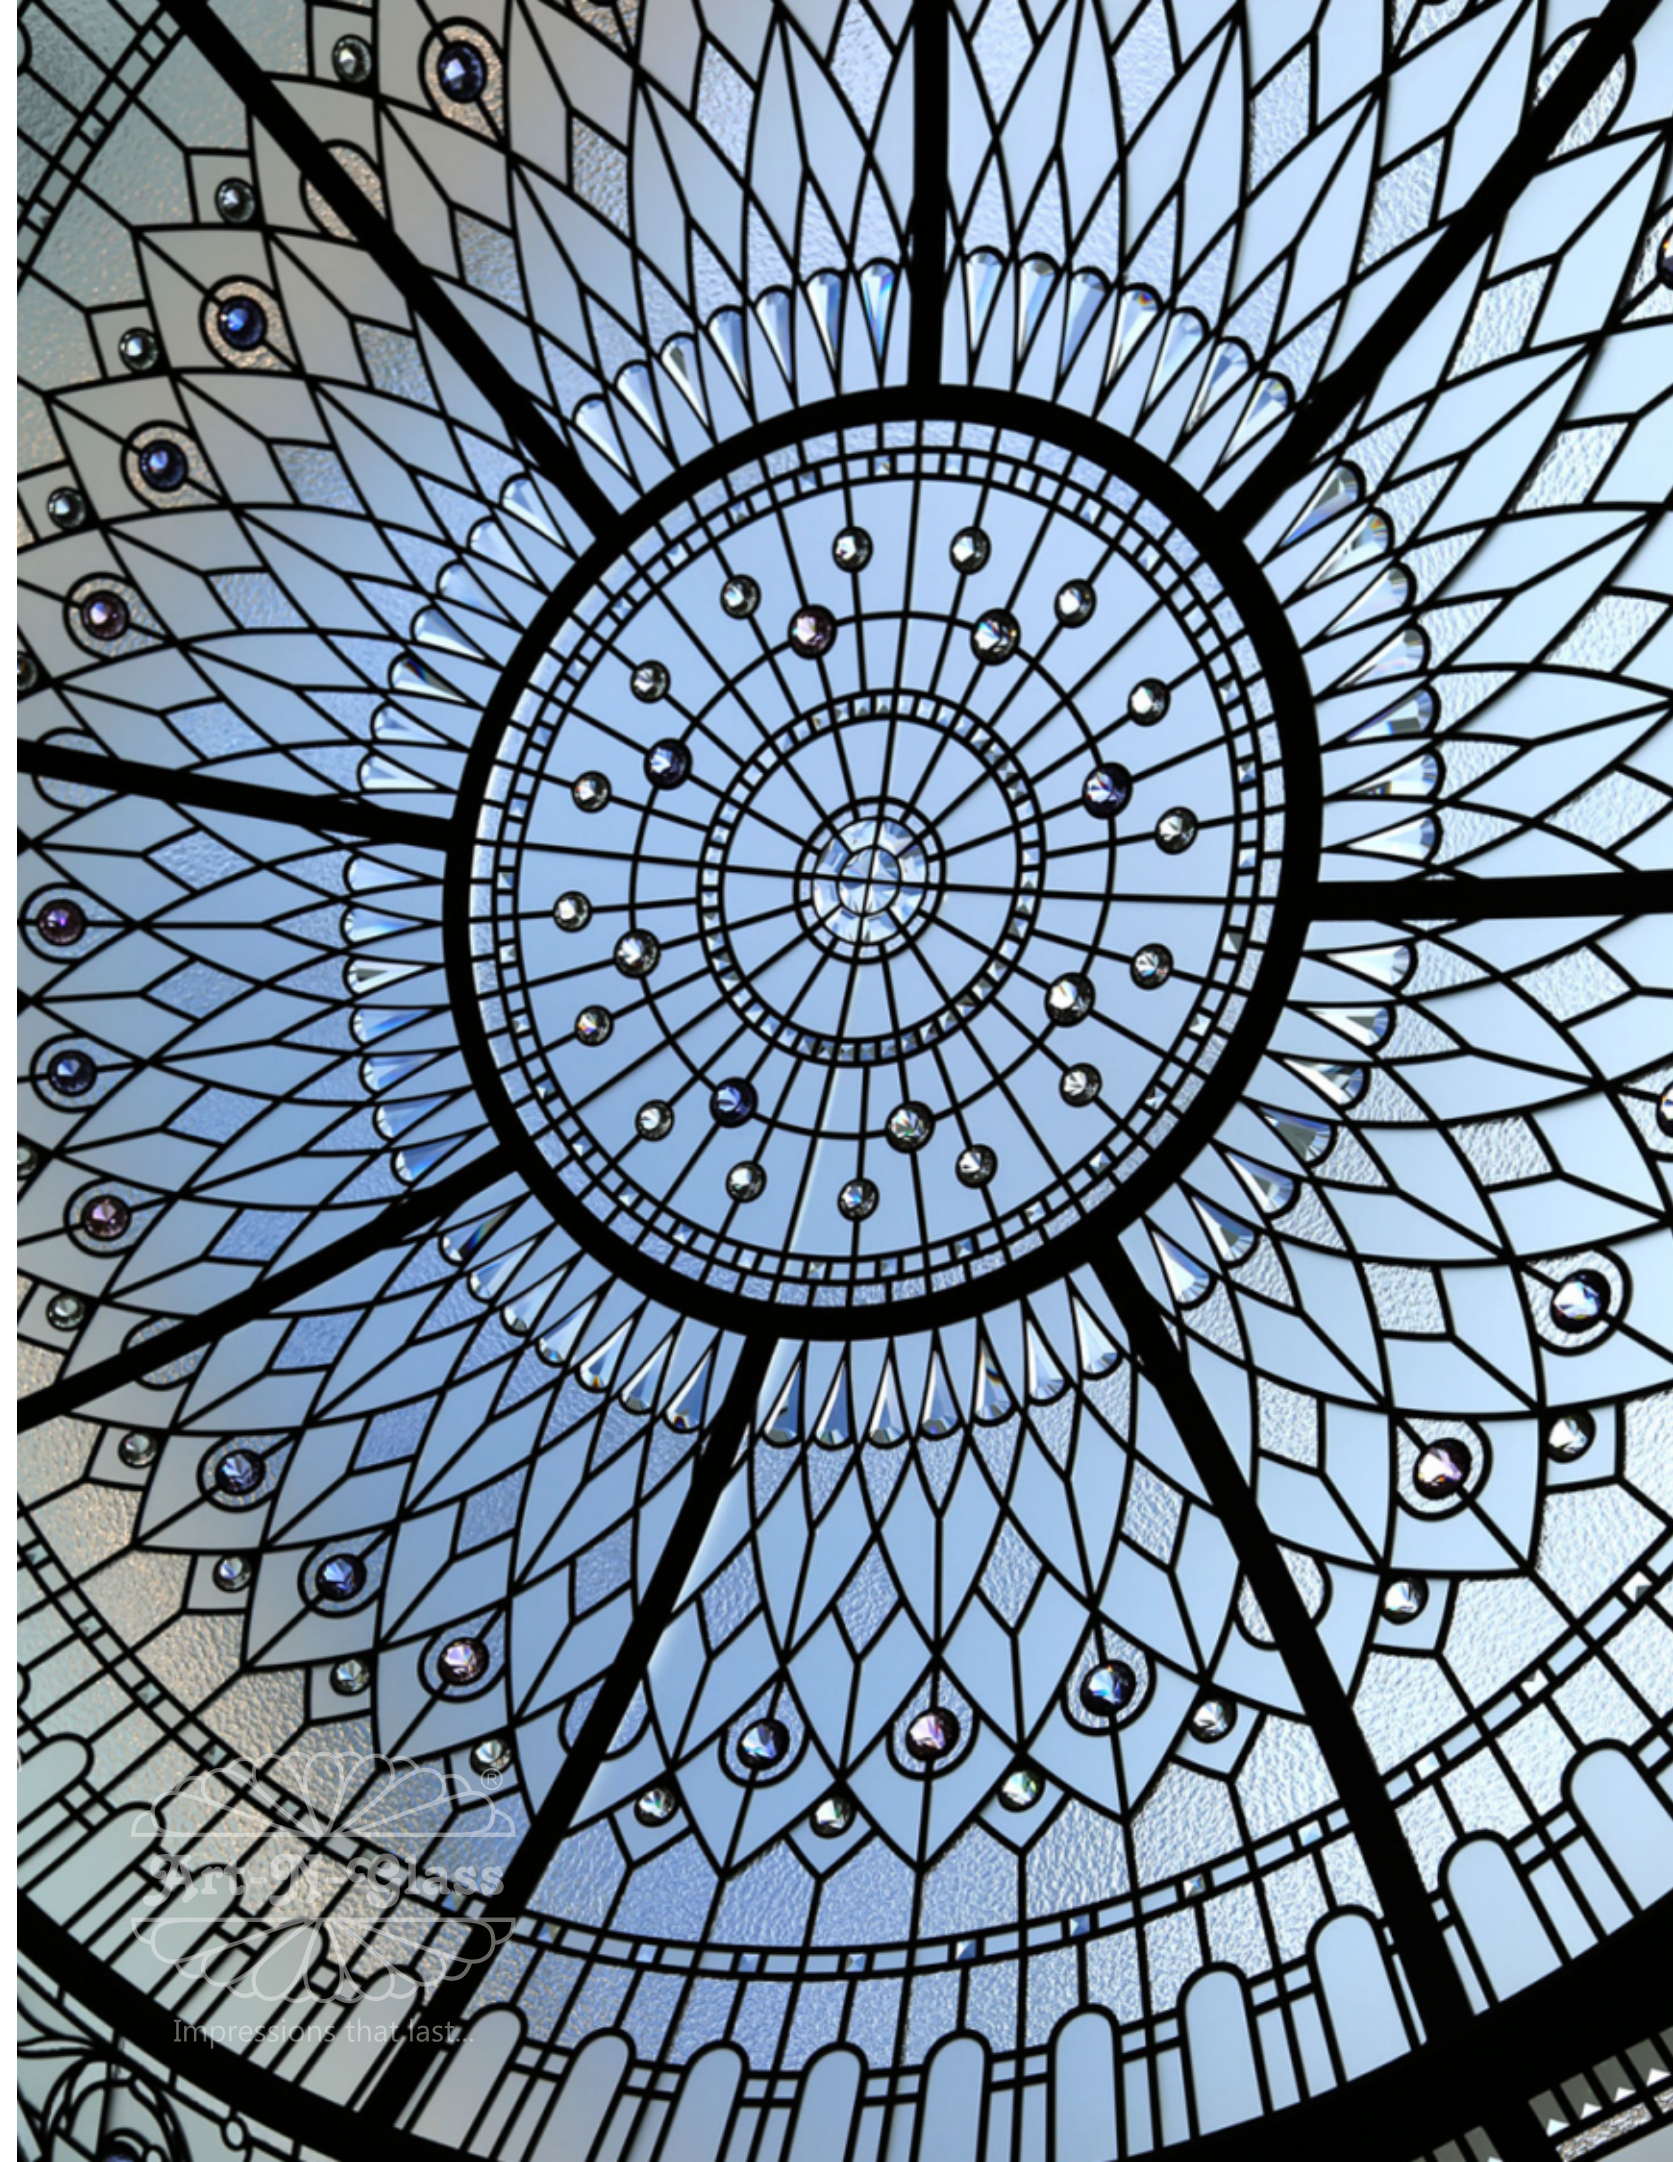

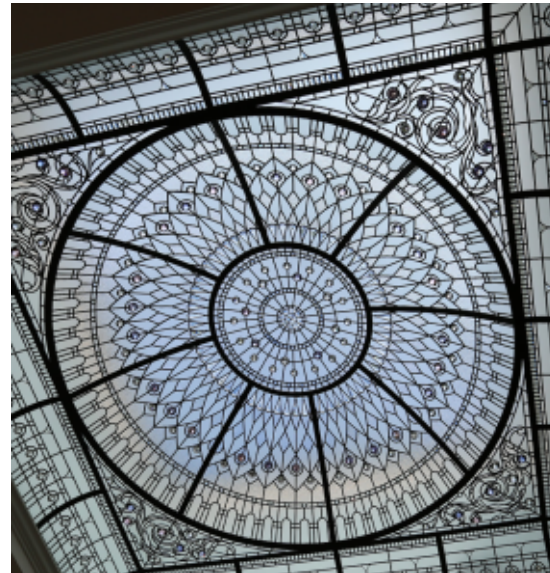

Residential stained and leaded glass dome ceiling for a luxury home created especially for a client from Connecticut. One of the most magnificent features of the grand, double-height great room with a two-story library is the ornate stained and leaded glass ceiling. It is exquisitely framed with walnut crown moulding. The roof of the beautiful glass skylight is intricately designed with burr-curved borders and a domed centre. Bespoke hand-beveled embellishments with a rich texture in the glass fabric are composed of beautifully coloured glass that has been subtly changed in colour. The area is filled with thousands of crystal gems and bevelled glass pieces that reflect light to create stunning designs. One of our studio's greatest and most remarkable work is this stained and leaded glass dome ceiling.

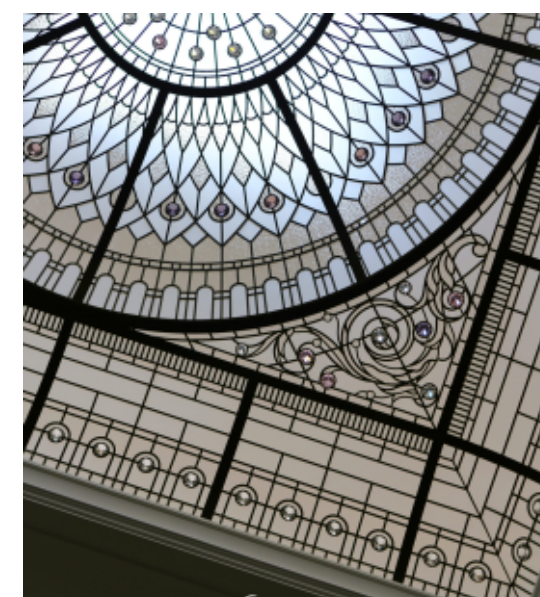

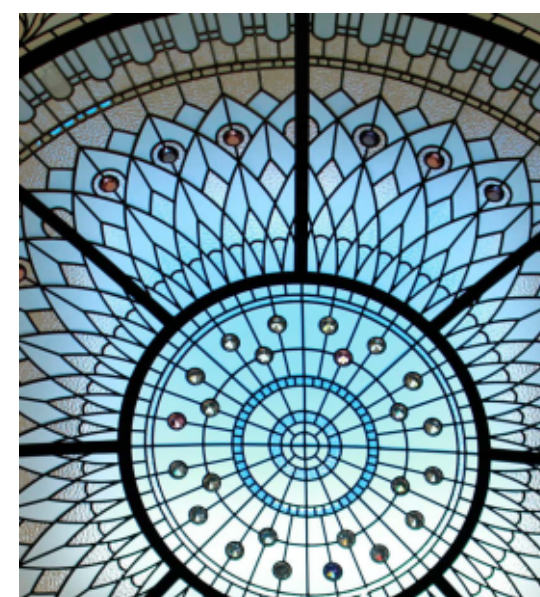

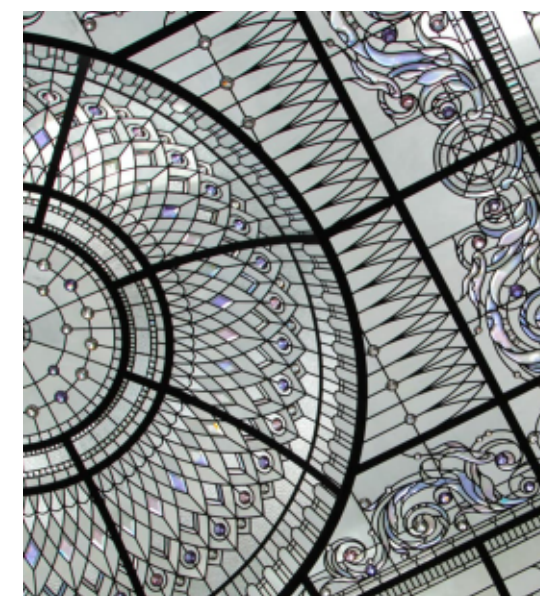

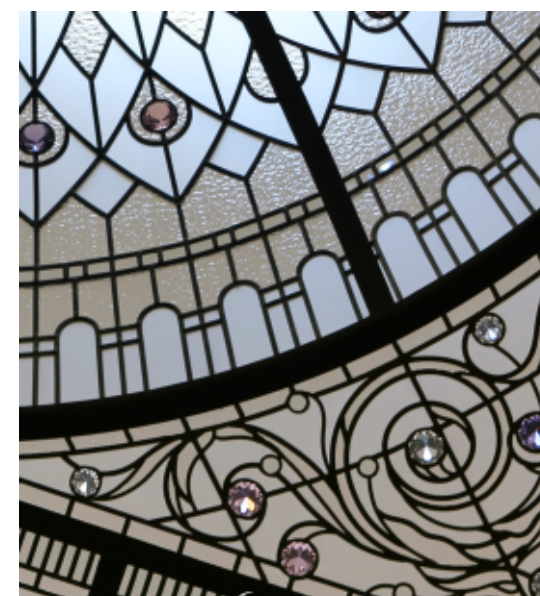

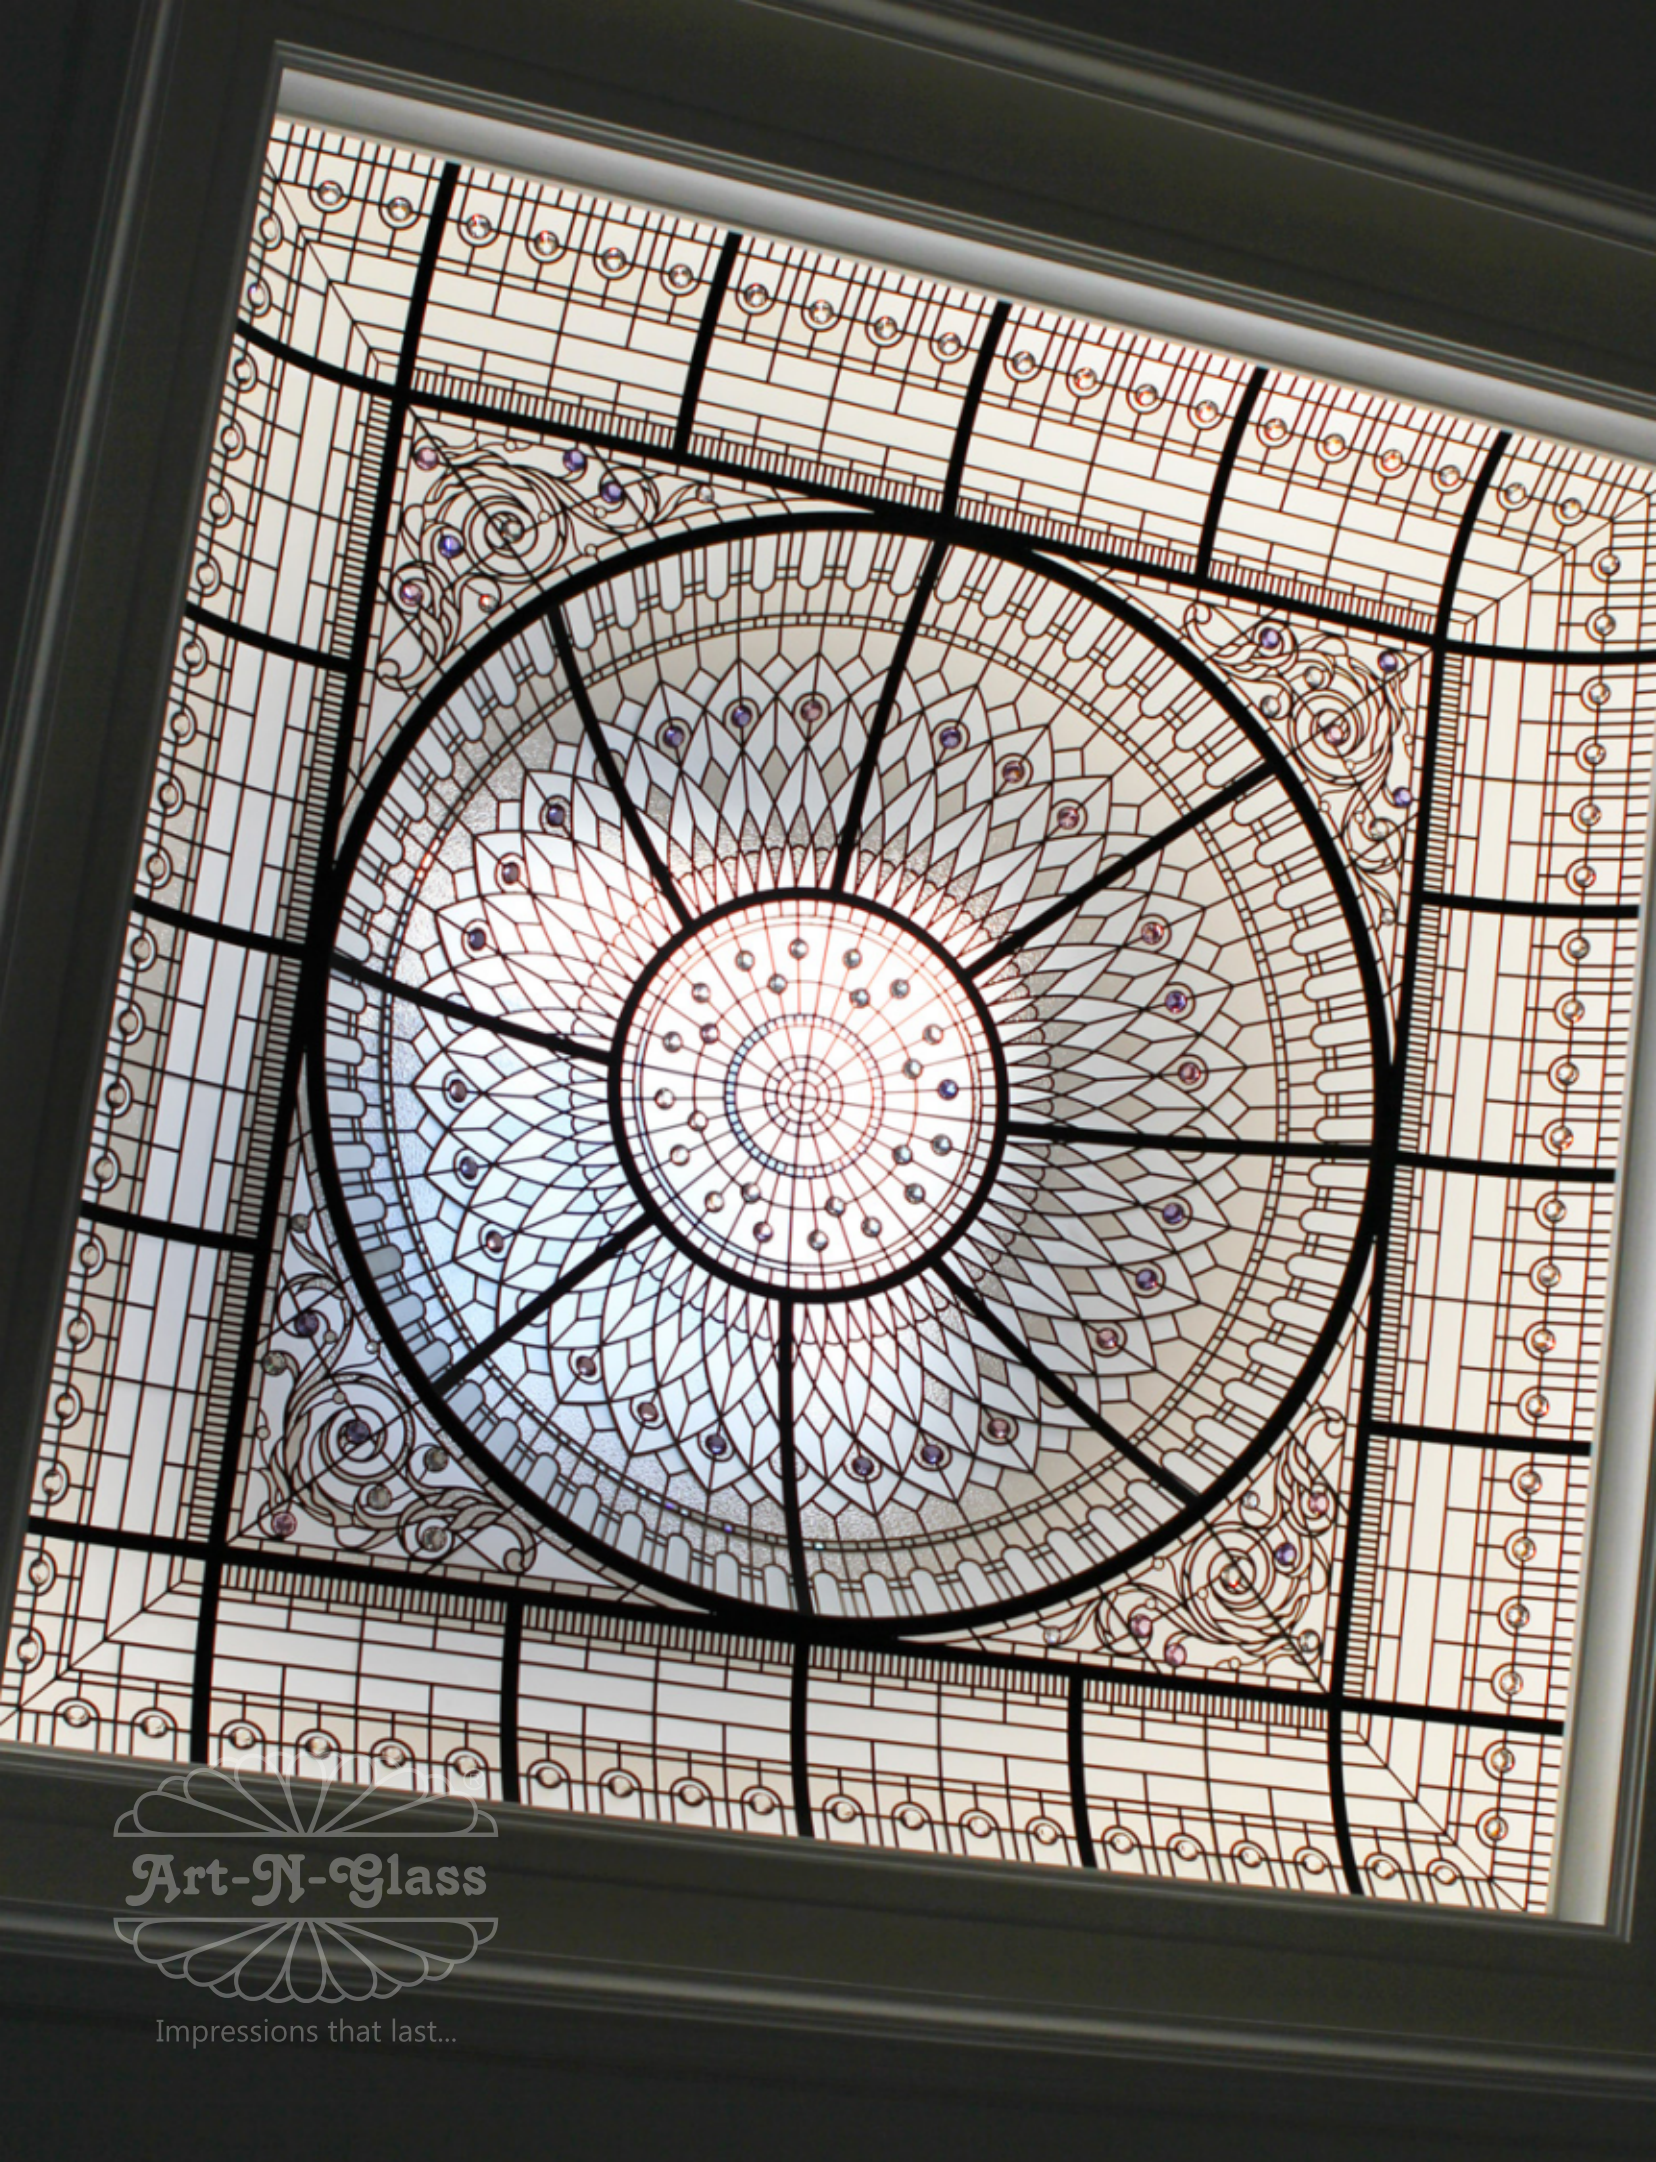

Stained and leaded glass dome roof skylight

Wayzata

A room's elegant handcrafted huge stained and leaded glass dome ceiling skylight was created with meditation and prayer in mind. The beautiful stained and leaded glass dome is the same size as the enormous roof glass skylight beneath which the stained glass dome is erected. Throughout the day, the sky and sun above the ornamental glass dome produce magnificent light displays, casting breathtaking rainbows and light shows into the space. The acanthus-inspired stained glass dome is in harmony with the floral fabriques and handcrafted carpet. View more inside pictures on Katie Redpath Constable's website.

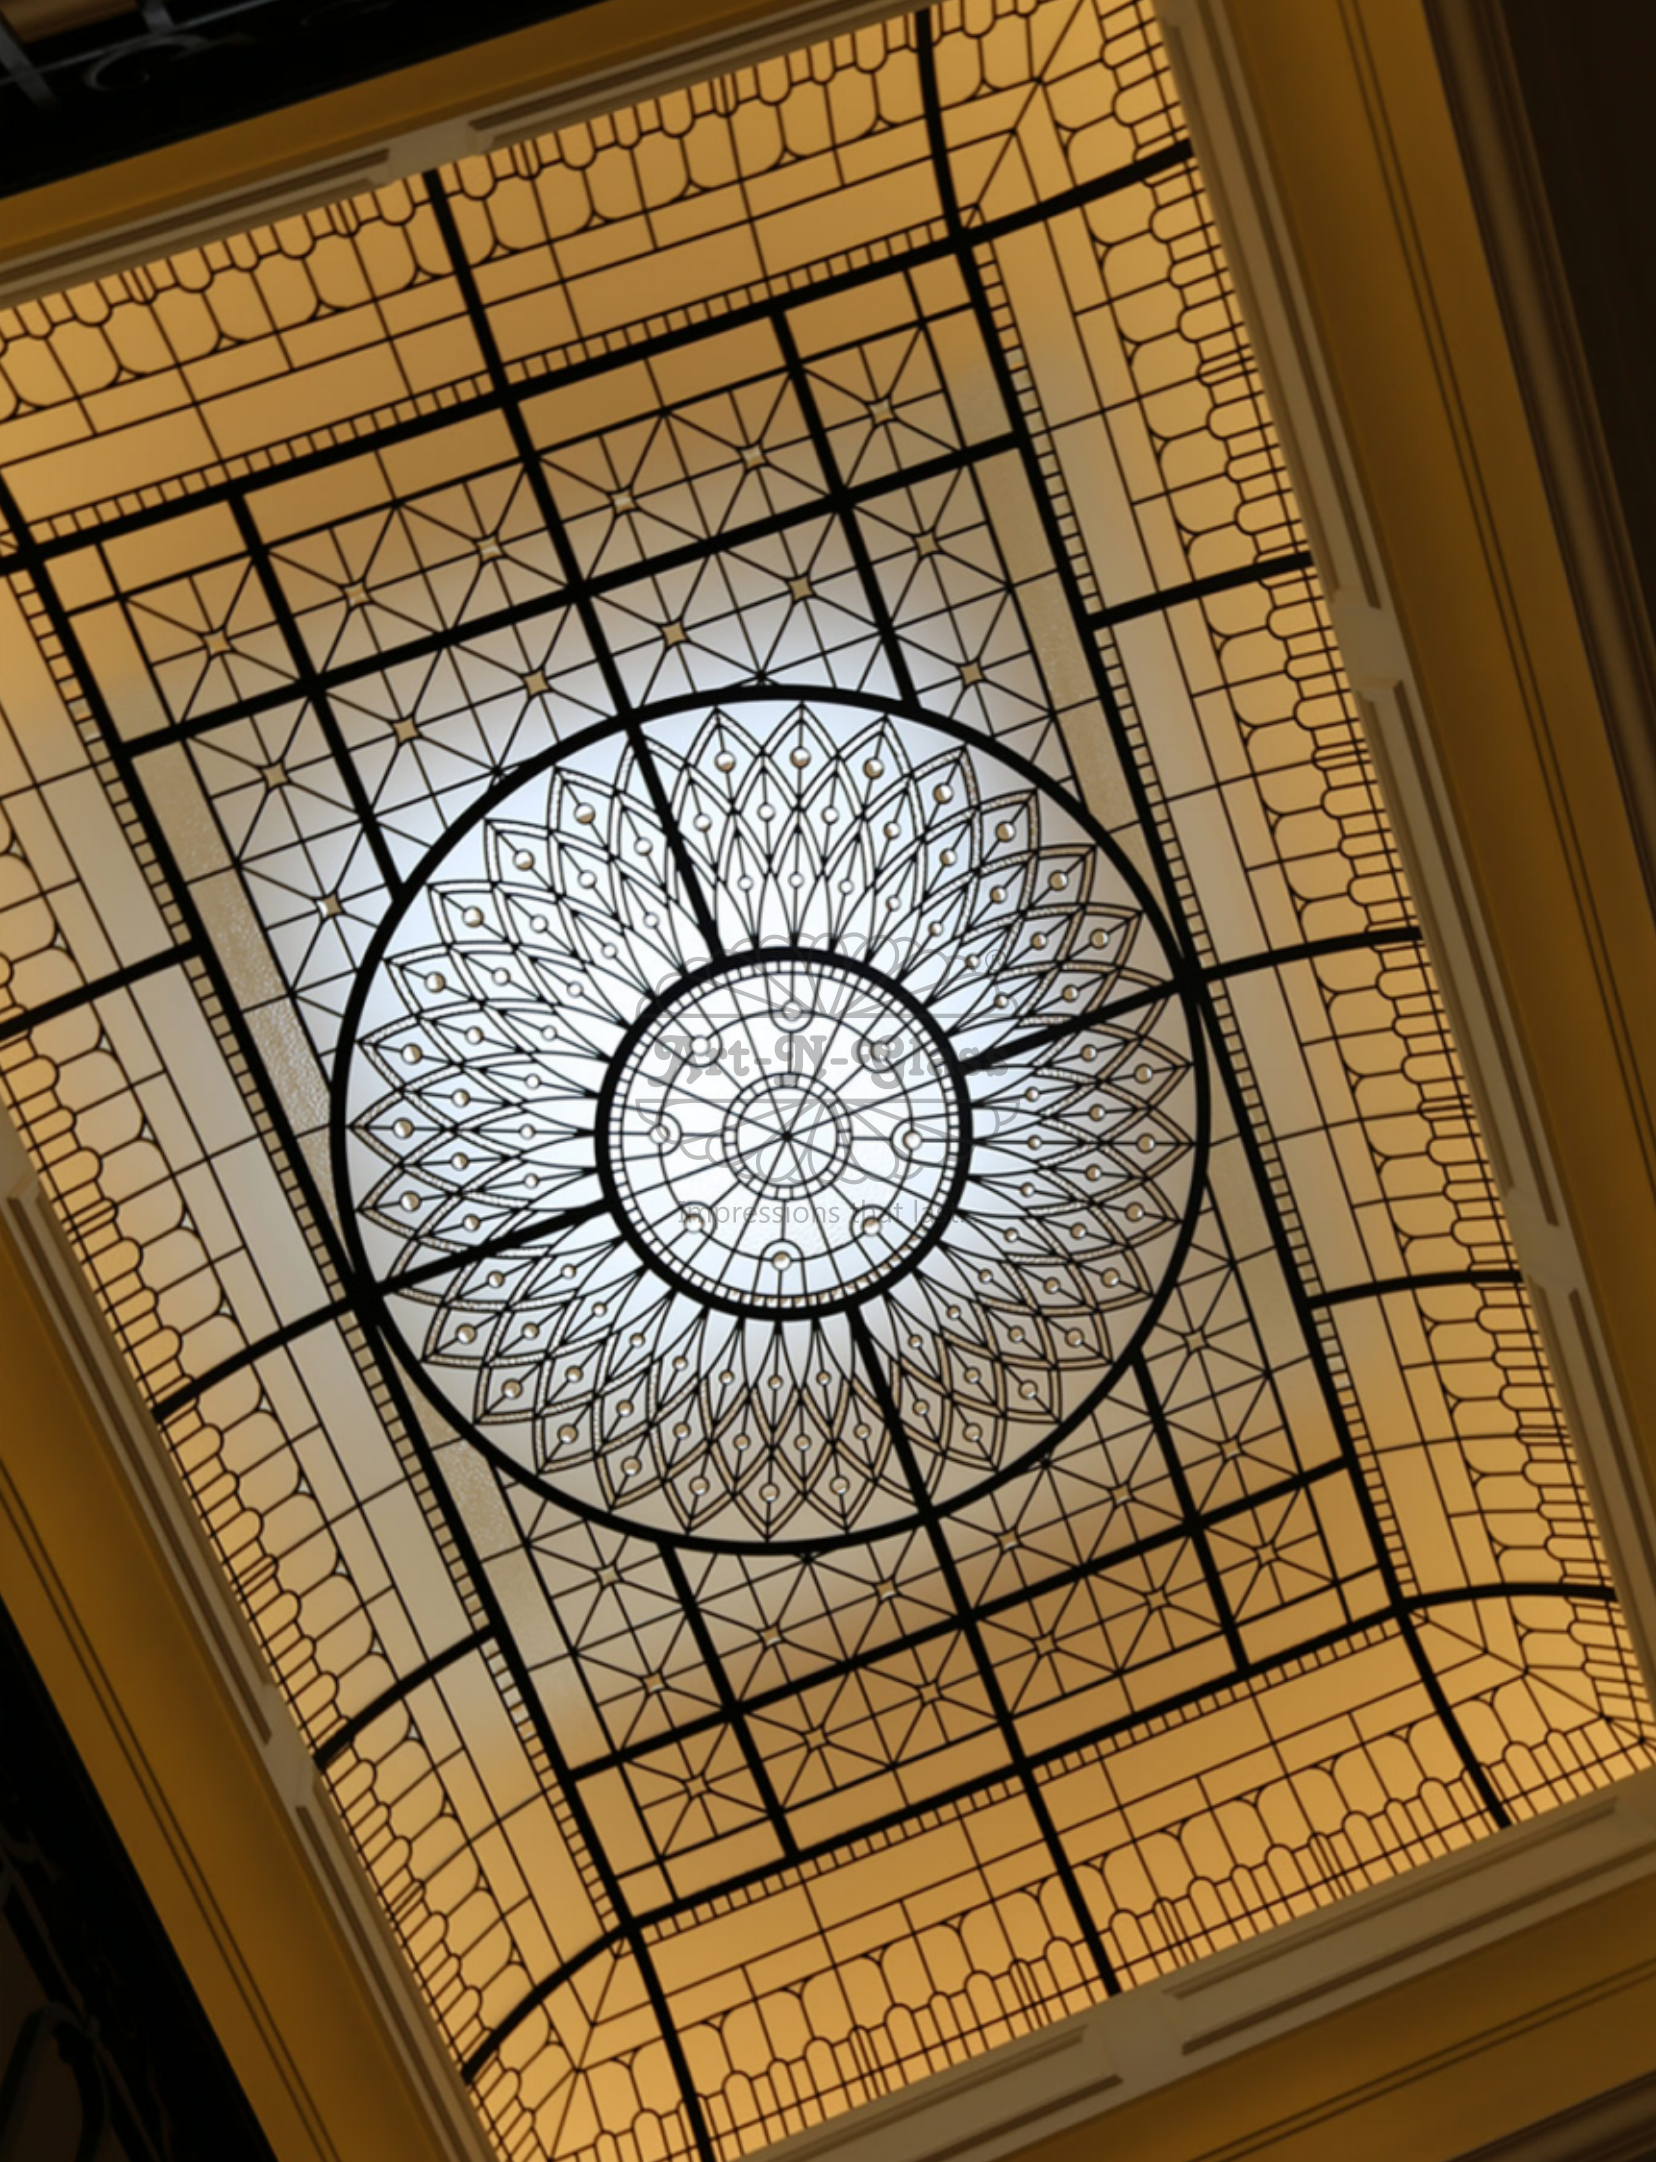

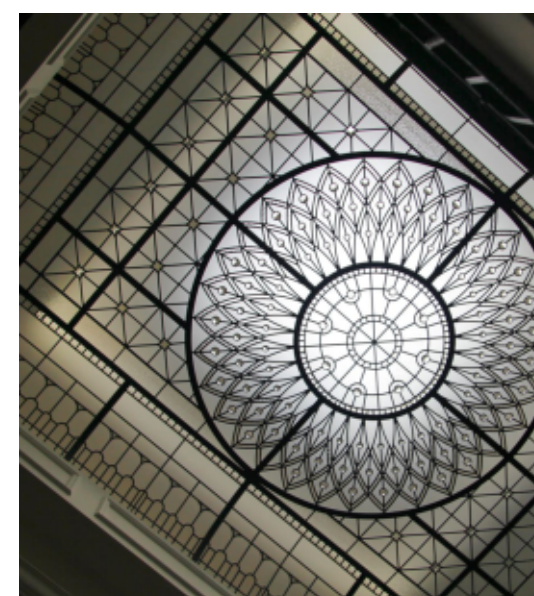

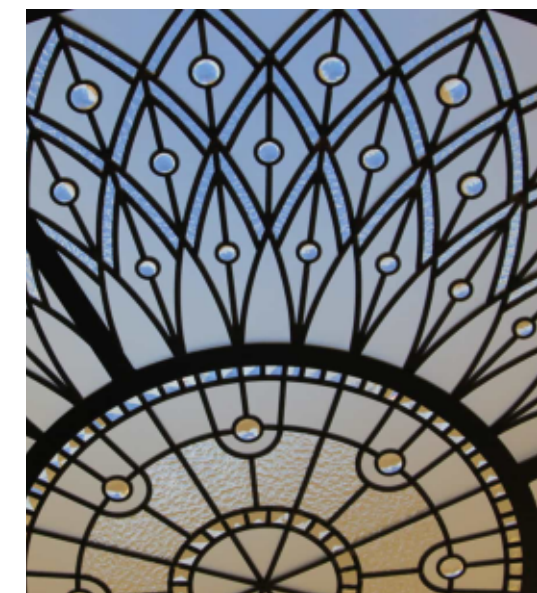

Atrium stained and leaded glass dome ceiling

The Bridle Path

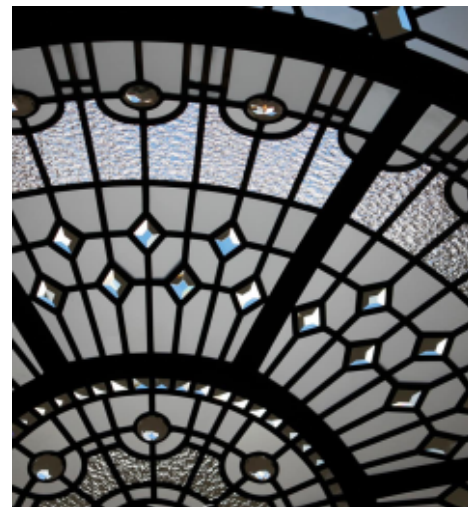

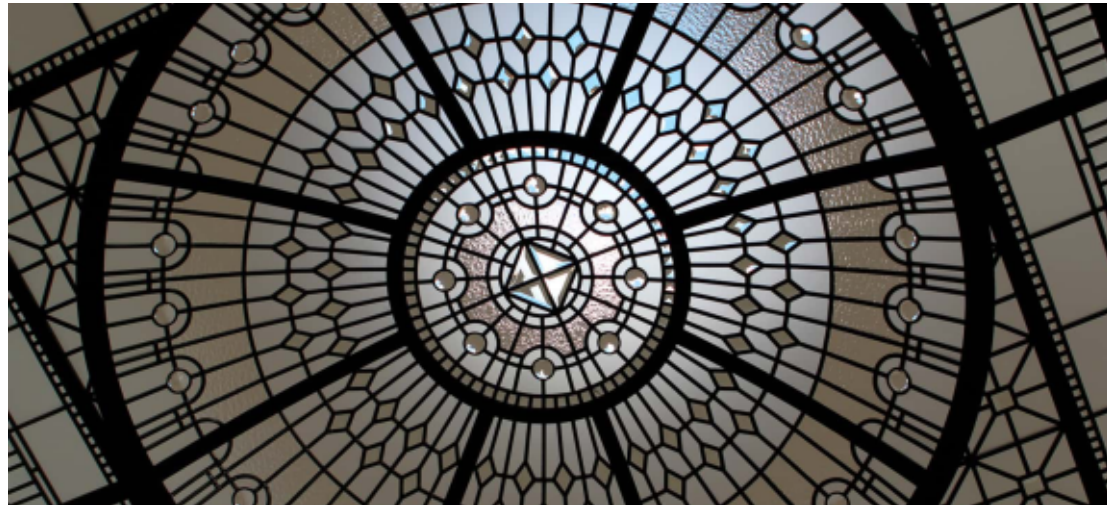

A stunning, huge atrium skylight modelled after the Plaza Hotel in New York crowns this luxurious, custom-built home's double-height entrance lobby. The glass dome was created using several clear textured art glass types and was accentuated with bevelled glass and delicate, ethereal crystal stained glass jewels in various colours. We also created a stained and leaded glass dome ceiling for the contemporary master bathroom ensuite for this premium residence.

Barrel vault stained and leaded glass ceiling light
LyRa

Toronto custom-built luxury home stairway ceiling light with decorative barrel vault stained and leaded glass. The ornate glass ceiling design is influenced by timeless features from earlier eras and exhibits a modern approach to glass design. The gorgeous glass ceiling transforms into a magical wonderland at night thanks to the lighting.

Master bathroom led glass dome skylight

The Bridle Path

Leaded glass dome skylight ceiling in a luxurious modern master bathroom adds ambient lighting while maintaining the space's seclusion. In comparison to many bathrooms at six-star hotels, the master bedroom ensuite is more opulent. Natural light flowing in via the acrylic roof skylight is transformed into a luxurious spa-like experience by the stained glass dome's simple geometric design, clear textured glass with bevelled glass diamonds, and crystal stained glass jewels. We complete a stunning atrium stained and leaded glass dome for the double-height entrance foyer for the same property that would compete with The Plaza Hotel stained glass skylight.

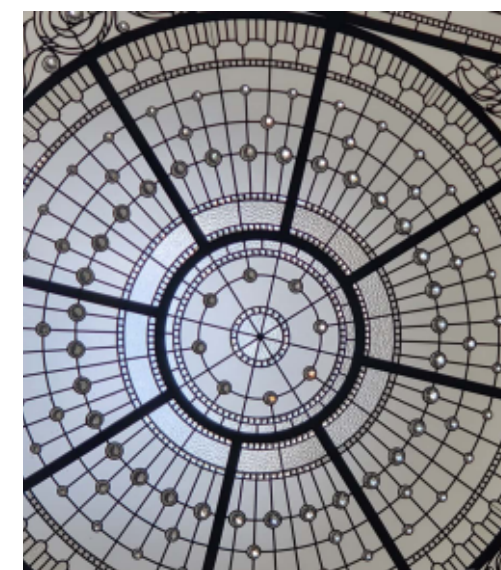

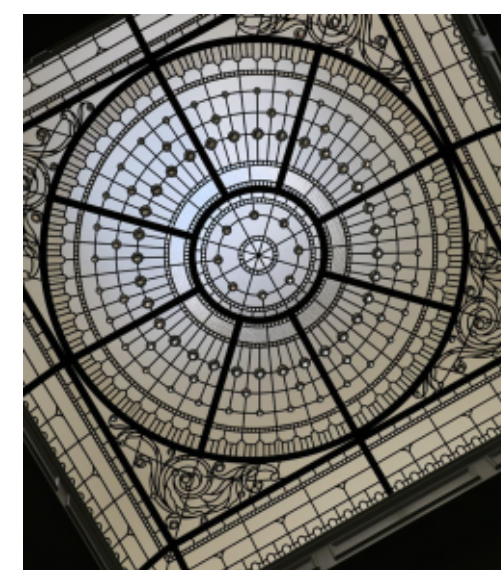

Vaulted stained and leaded glass lay light skylight
Scarsdale

Granoff Architects, a Greenwich-based architectural firm, expertly refurbished this historic Scarsdale, New York home built in 1905 for Mark and Lisa Bezos. One of the most stunning mansions in Scarsdale, according to the description of the residence. It greets guests and residents with a double-height entry lobby that is topped with a huge traditional stained glass ceiling skylight.

Barrel vaulted stained glass skylight Silver Hills

A custom-built luxury home in Toronto features a barrel-vaulted stained glass skylight above a double-height stairs.

Impressions that last...

Ceilings

Glass Domed

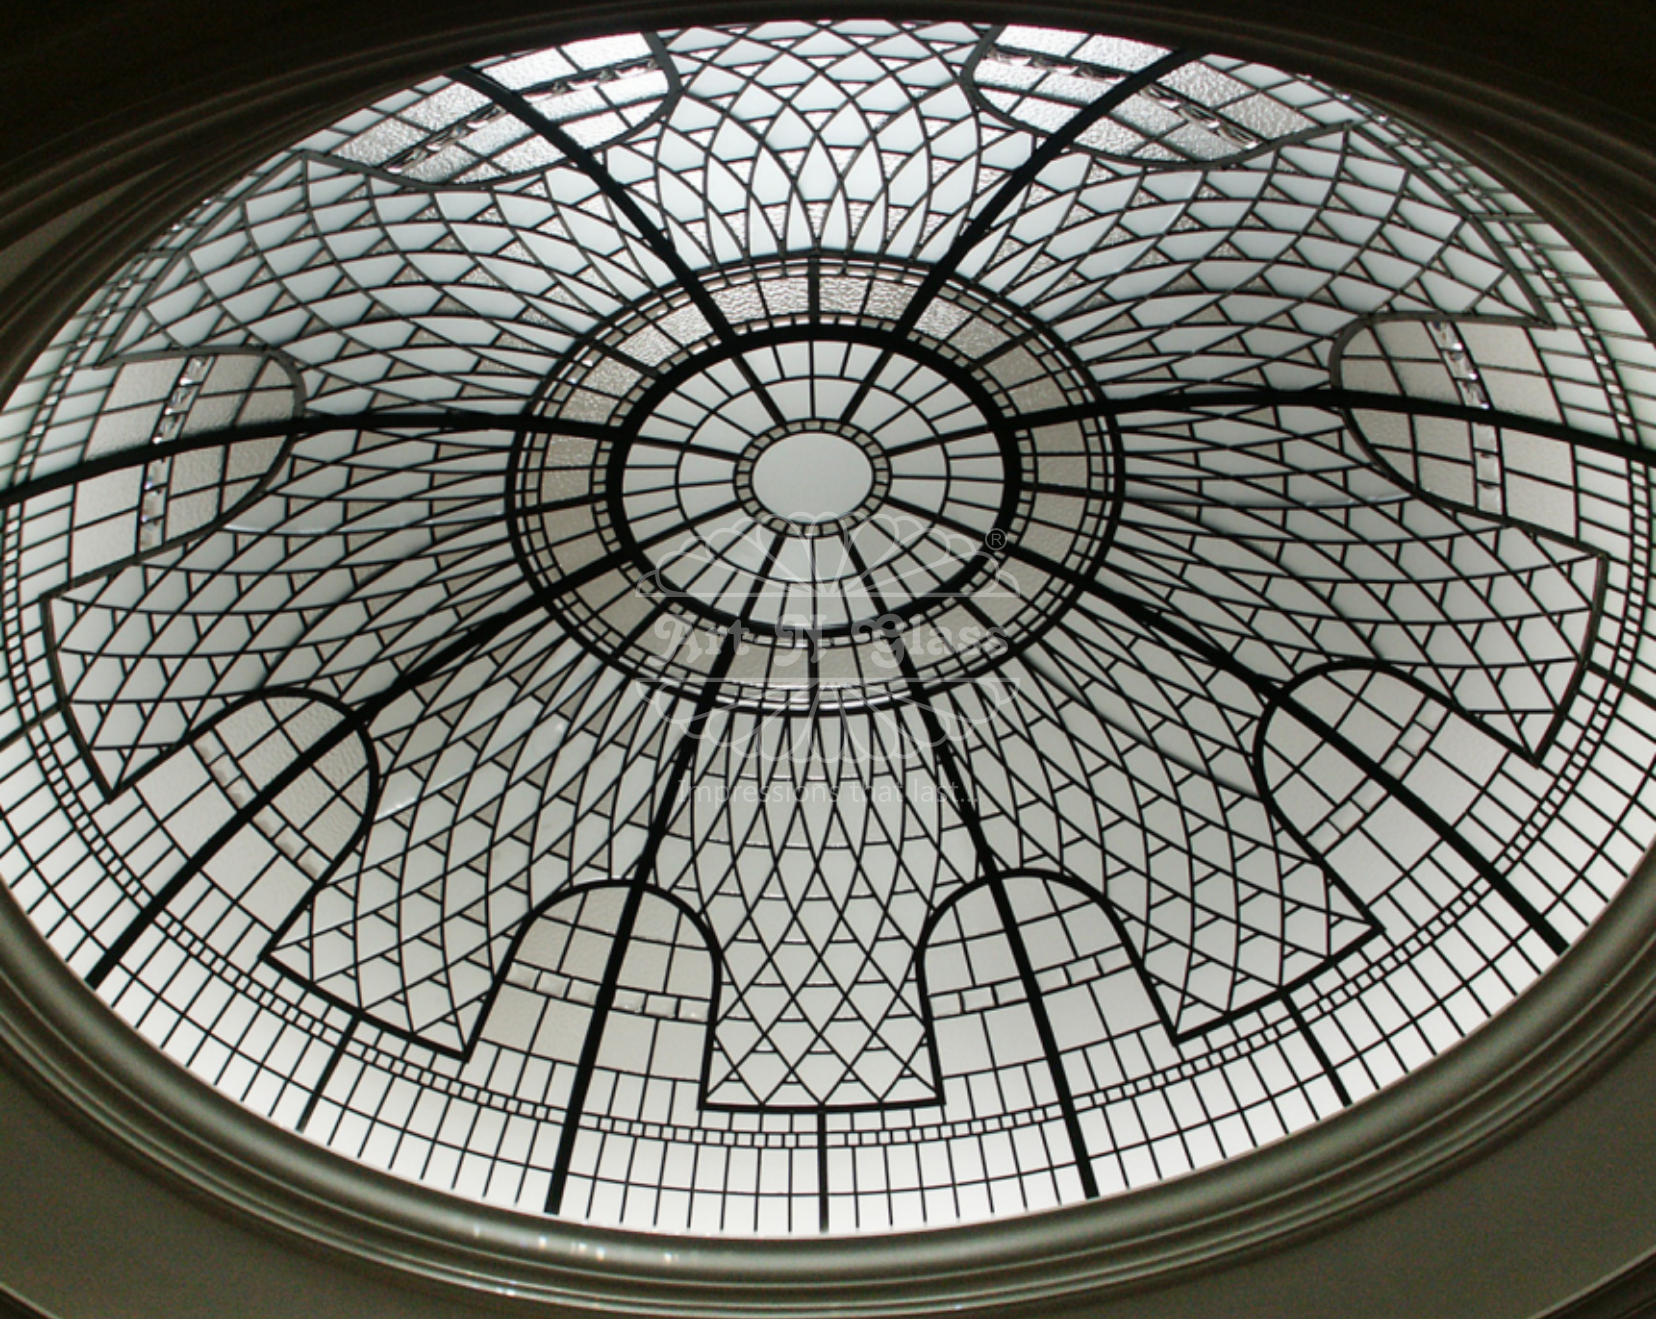

Contemporary stained and leaded glass dome

Rising Star

Beautiful natural light is provided by the modern stained and leaded glass dome's simple geometric design, which also opens up the internal area below. The area is bathed in refracted light effects from the bevelled glass and crystal jewels, giving the wonder of art glass to everyday life. A luxurious, custom-built home has a big stained glass dome erected over the double-height foyer. Our beautiful glass flat circular skylight that we installed for another client in Toronto served as the inspiration for this project.

Large leaded glass dome skylight ceiling Valerie

A big leaded glass dome skylight ceiling with a classically inspired style was specifically created for a Toronto custom-built home's stairway hallway. The ornate glass ceiling, which is composed entirely of transparent textured art glass, bevelled glass, and clear crystal jewels, is exquisitely framed by plaster mouldings. The traditional crystal cut glass pattern of the rosette element served as inspiration for the stained and leaded glass dome design.

The interior of the house is illuminated in a lovely fashion by a clear stained and leaded glass ceiling put under a roof skylight, which adds natural light to the room.

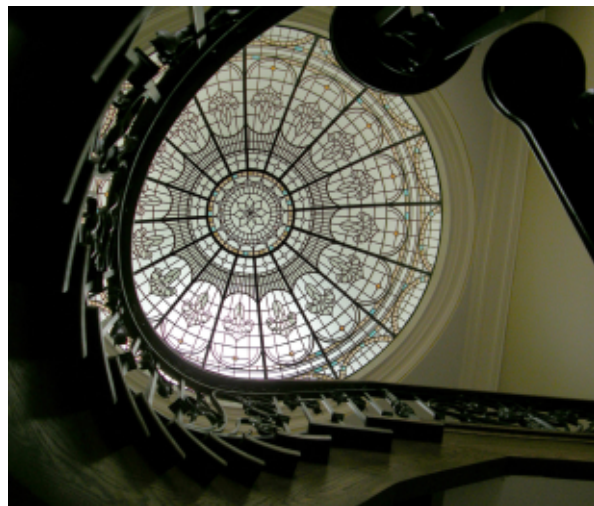

Octagonal stained and leaded glass dome
Gordon

Classic Toronto custom-built home stairway hall stained and leaded glass dome with octagonal design.

Ornamental stained and leaded glass dome

Angelica

A decorative stained and leaded glass dome with classical inspiration was specially made for the double-height foyer of a property in Great Neck, New York. A beautiful glass dome that lets in natural light has a sumptuous appearance thanks to the use of coloured hand-bevelled glass in conjunction with clear bevelled glass and clear textured glass. In 2010, the glass dome was highlighted in Our Homes Magazine.

Residential stained and leaded glass circular skylight ceiling

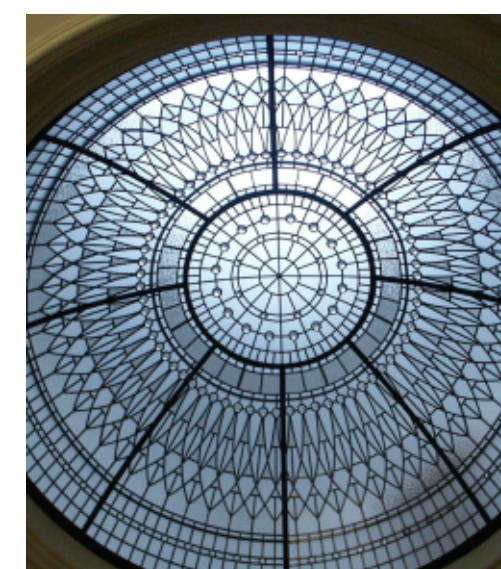

Montessor

Traditional circular stained and leaded glass skylight ceiling made specifically for the hallway of a Toronto custom-built home with a circular staircase. The ornamental glass ceiling, which is formed of architectural art glass in pastel colours and bevelled glass pieces, is beautifully framed by exquisite plaster mouldings. The stained and leaded glass ceiling skylight design was inspired by historical rotunda glass dome at Cleveland Trust Company Building.

A clear stained and leaded glass ceiling installed beneath a roof skylight beautifully illuminates the room with natural light through a variety of rich glass effects.

Residential stained and leaded glass dome Irene

Classically inspired residential stained glass dome custom made for the double-height entrance foyer of a custom-built home in Vaughan. The room is beautifully illuminated by a clear leaded glass dome installed beneath the roof skylight, which uses a variety of rich glass effects to create natural light. The decorative stained glass dome was featured in Builder/Architect Magazine in 2009

Residential stained glass dome skylight

Summerhill

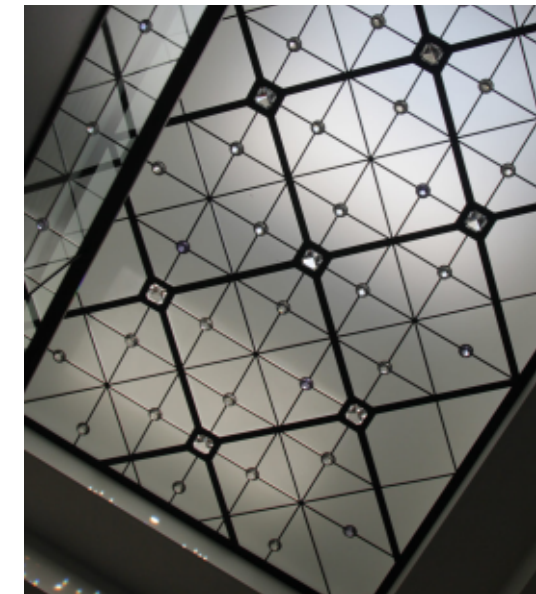

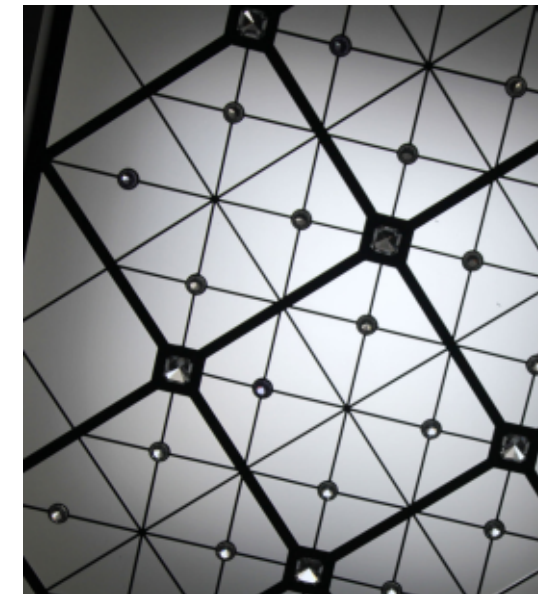

For a double-height entry foyer of a custom-built home in Richmond Hill, a traditional stained glass dome skylight in simple geometric form with coloured bevelled glass and bronze textured accent glass was installed.

Ceilings

Large Flat Skylights

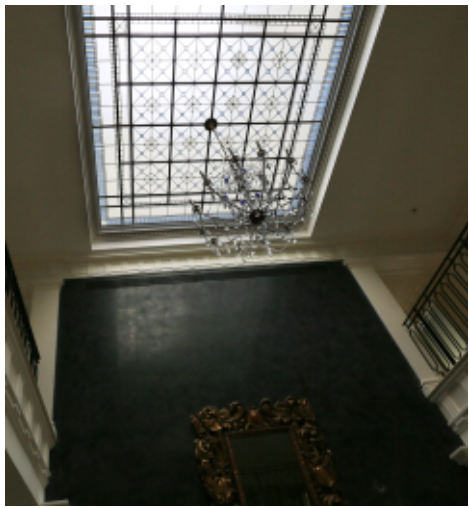

Contemporary stained and leaded glass skylight ceiling

Caprice

A modern, custom-built home in Toronto has a skylight ceiling made of contemporary stained and leaded glass. A skylight made of stained glass with a simple design tops the double-height atrium staircase. The glass railings of a staircase reflect the art glass ceiling. The corridor walls are coated in prisms of diffused light from stained glass crystal gems when the sun shines through the artistic glass ceiling. Amazing glass light play effects. Igor Vahotiv, Domus-Studio, the designer's website, has further photos of the home.

Large stained and leaded glass skylight ceiling The Scent of London

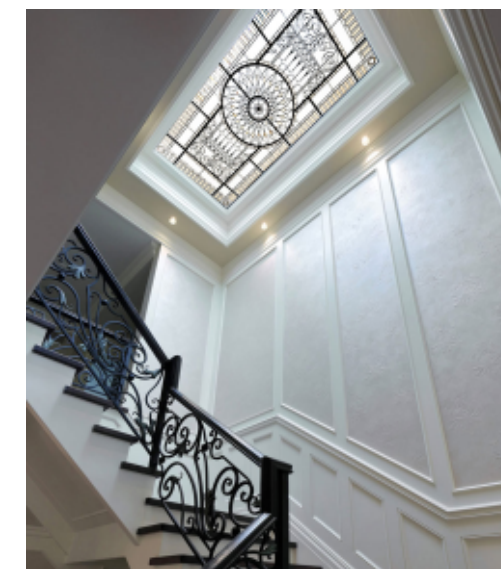

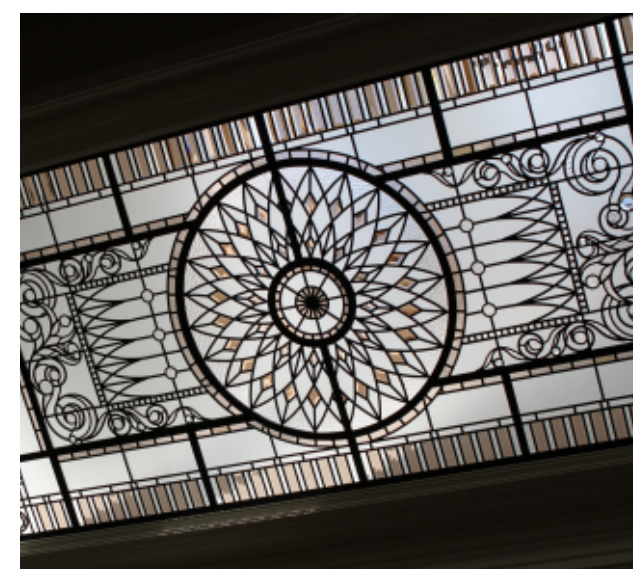

A double-height great room with a large skylight ceiling made of stained and leaded glass and a crystal chandelier fills the room with light. The ancient homes of Great Britain served as inspiration for the ornate glass ceiling. The hand-beveled clear and blue bevelled glass skylight is designed using stained and leaded glass and is based on a straightforward geometric pattern. The glass ceiling's centre supports a crystal chandelier. We created a small octagon-shaped leaded glass skylight for the hallway and an oval stained and leaded glass dome to be placed above the oval staircase for the same home. Timothy Mather Design, based in Toronto and London, produced the interior design. On Timothy Mather's website, you may see more pictures of this project.

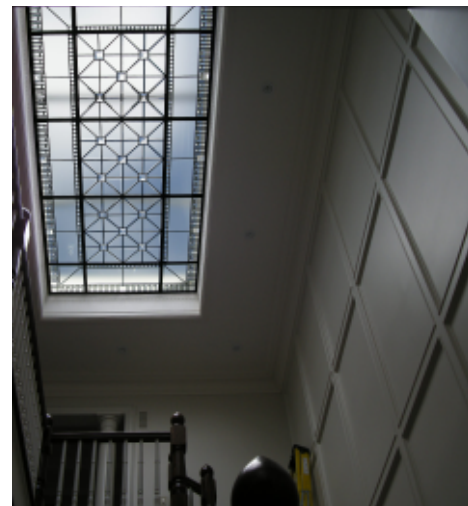

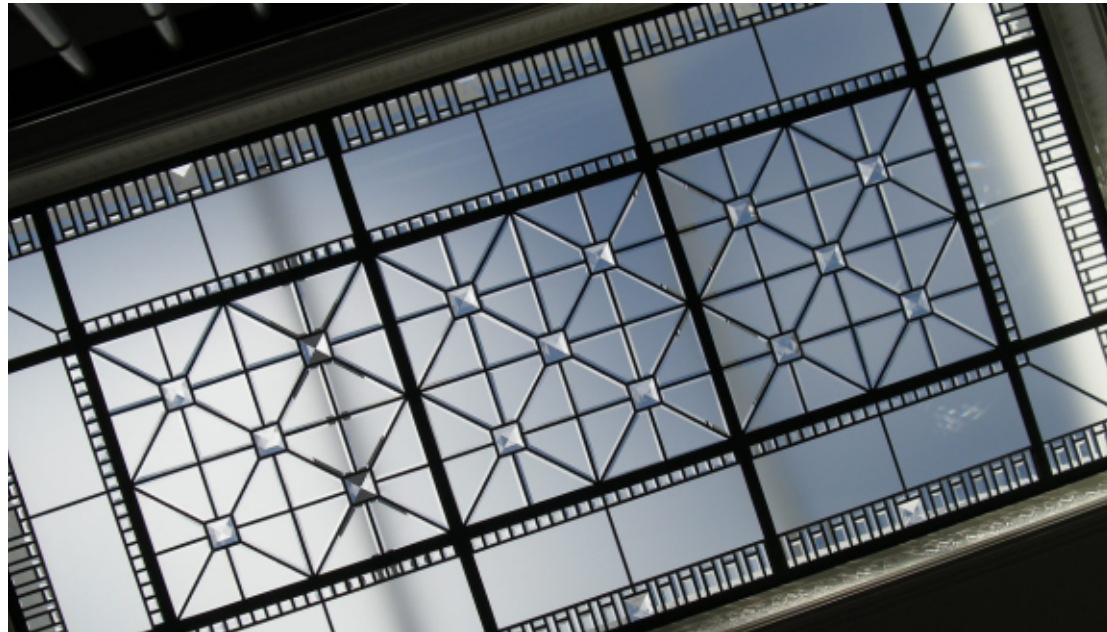

Classic leaded glass skylight lay light Mississauga Road

For a custom-built home on Mississauga Road in the Credit River area, a traditional leaded glass skylight lay light was specially created for the stairway corridor. To highlight the current attitude to living, the leaded glass skylight design was inspired by classic ornaments from earlier centuries. The stairwell's leaded glass skylight, which was erected, lets in natural light.

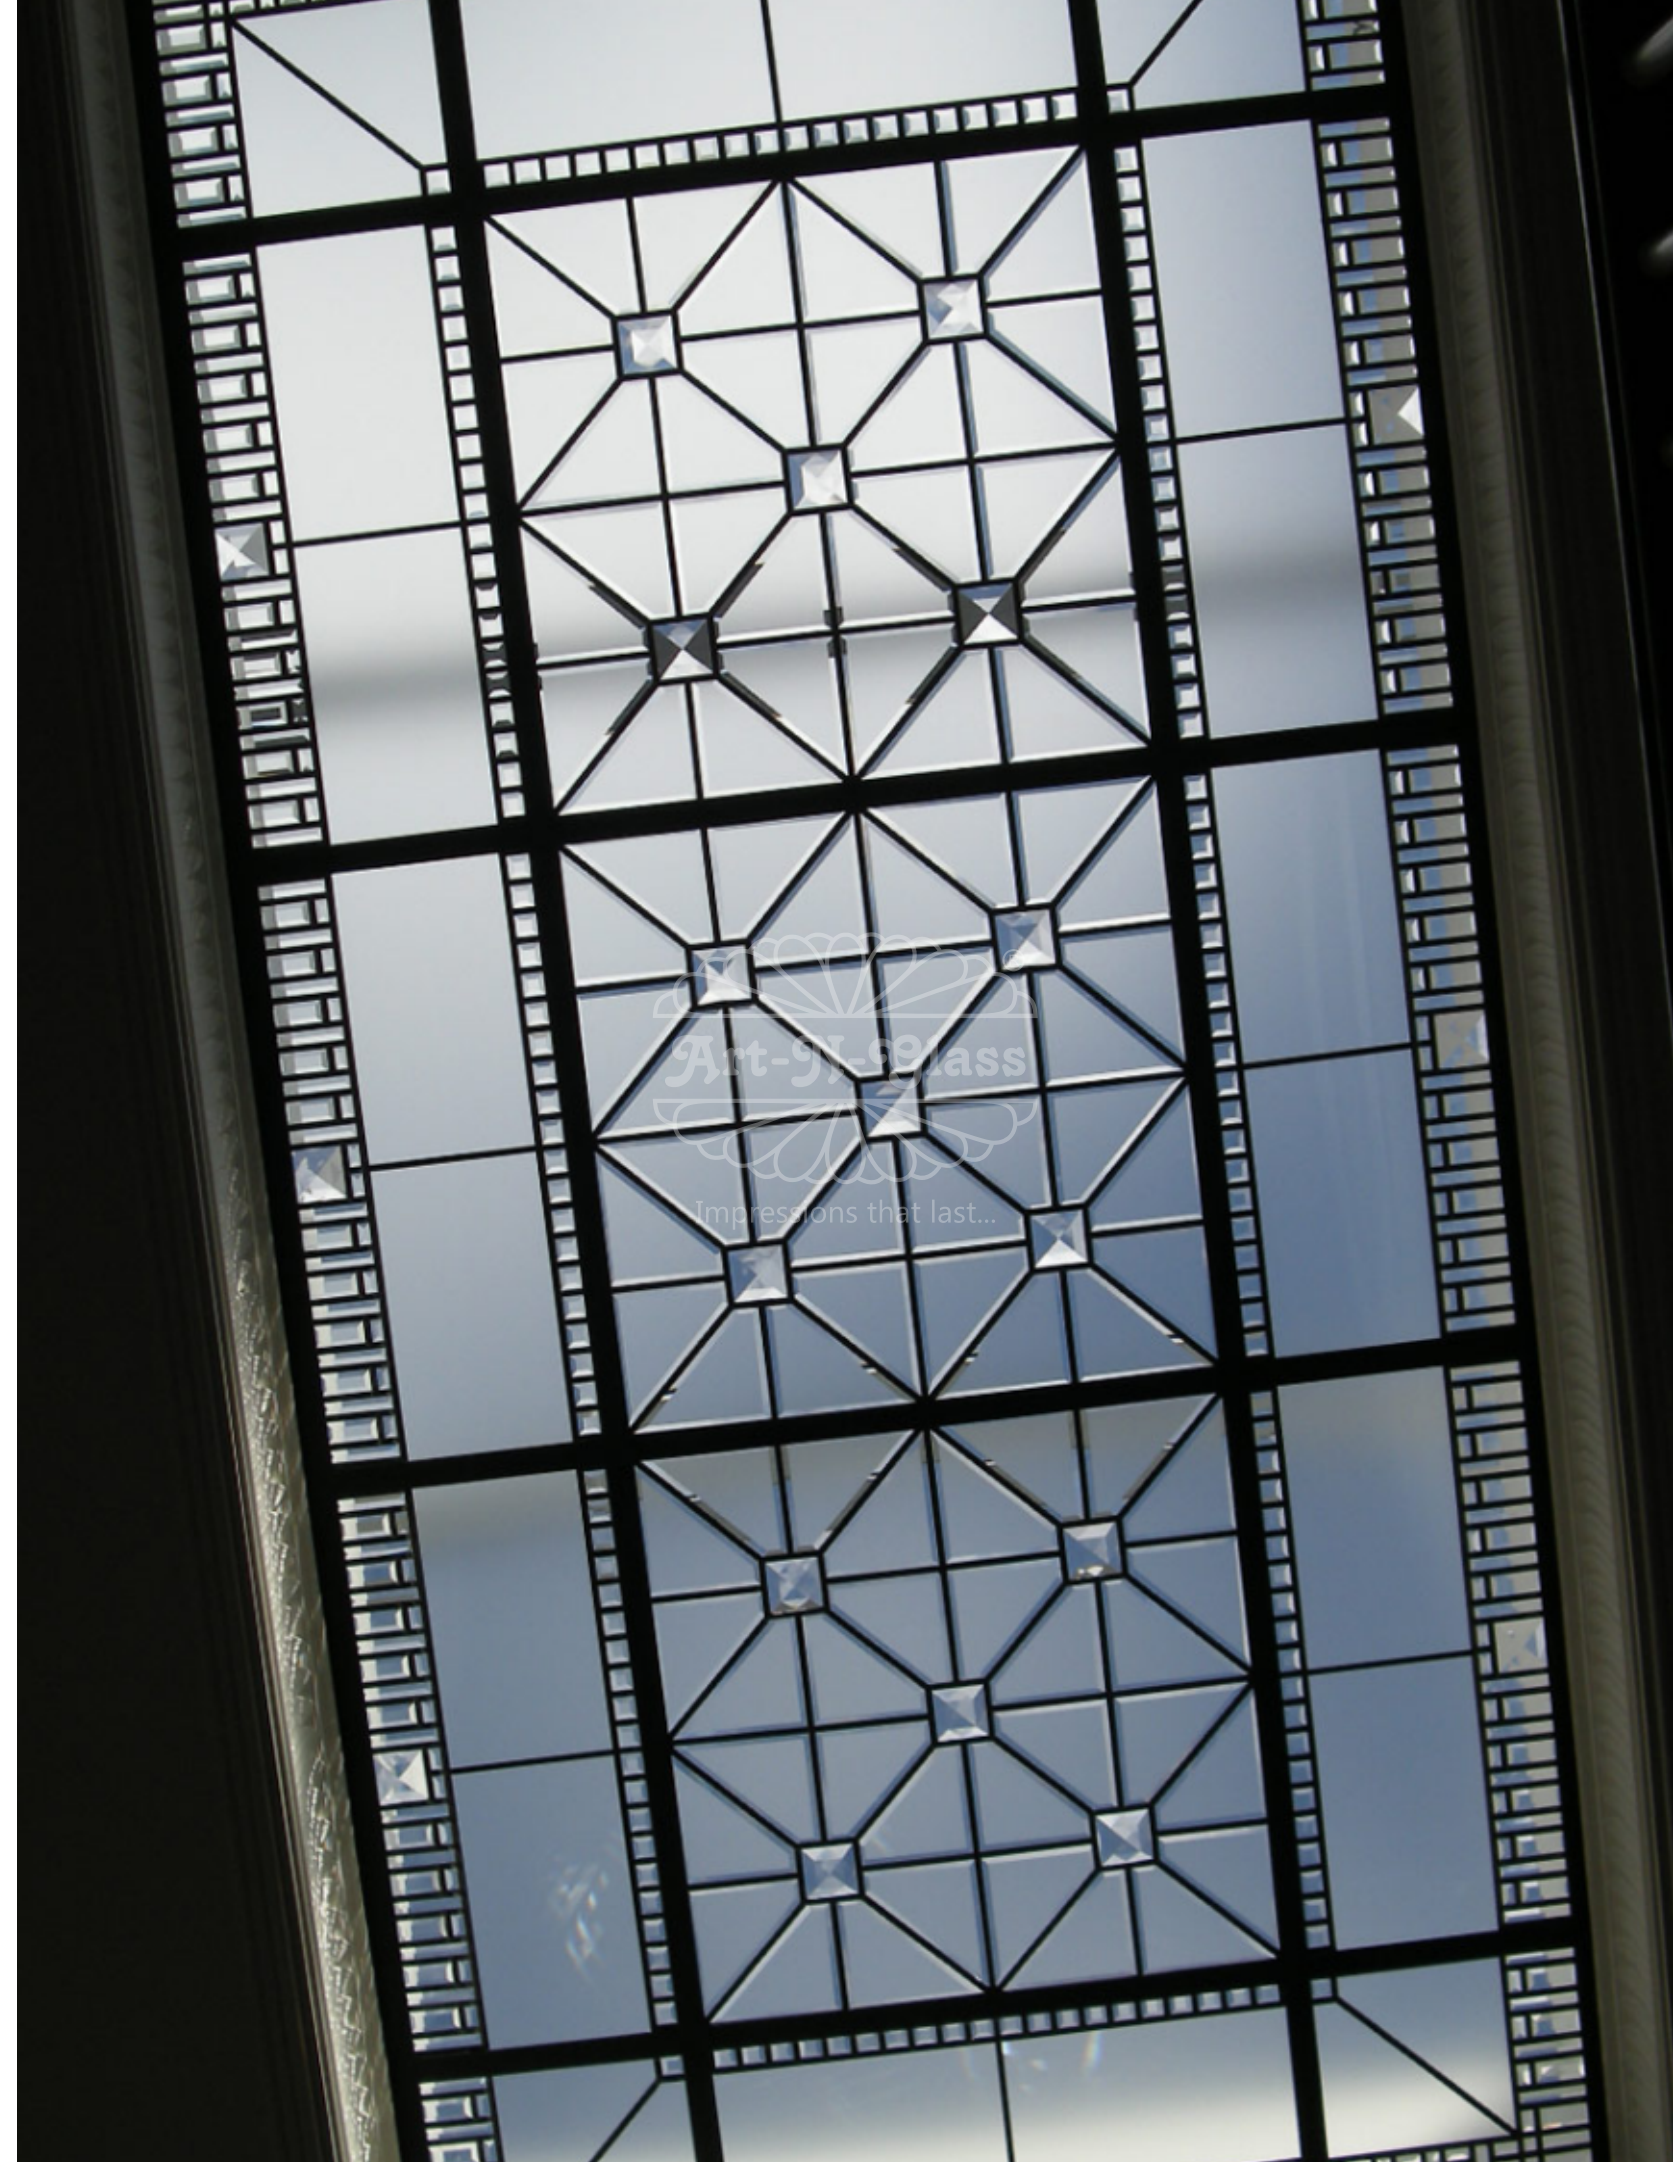

Large flat leaded glass skylight ceiling

Poplar Plains

A large skylight made of leaded glass hangs above the stairs of a Toronto custom-built home. The Georgian era's traditional geometric pattern served as inspiration for the ceiling design. To offer rich effects to the home's interior, the glass fabric is formed of extra-large crystal jewels and hand-bevelled acid-etched glass components. Builder / Architect Magazine featured the skylight in an

Racetrack oval stained and leaded glass lay light Forest Heights

A Toronto custom-built home's stairwell is illuminated by a decorative ceiling made of leaded and stained glass shaped like a racetrack. Stained glass ceiling art incorporated into a sophisticated steel frame building. Combining traditional geometric designs with the ever-classic grace of acanthus leaf embellishments

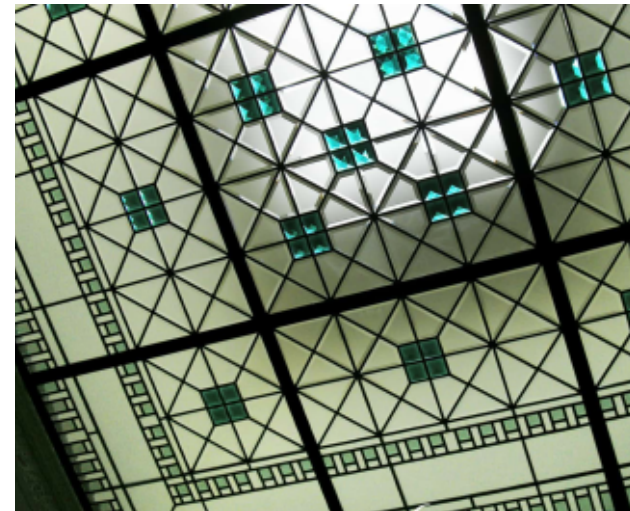

Large leaded glass skylight ceiling

Amadeo

A sizable skylight made of stained and leaded glass sits above the entryway stairs of a Toronto townhouse that was built to exacting standards. Large pale diamonds and coloured and transparent bevelled glass provide texture and mood to the room. Builder / Architect Magazine featured the skylight in an article that year.

Large stained and leaded glass skylight ceiling

Emerald Point

In the master bathroom of a custom-built home in Richmond Hill, there is a large stained and leaded glass skylight ceiling with hand-bevelled acid-etched glass and emerald crystal stained glass jewels above the stairway. Large pieces of faceted glass and crystal jewels are used to create the beautiful glass fabric, which adds rich lighting effects to the master bathroom's décor.

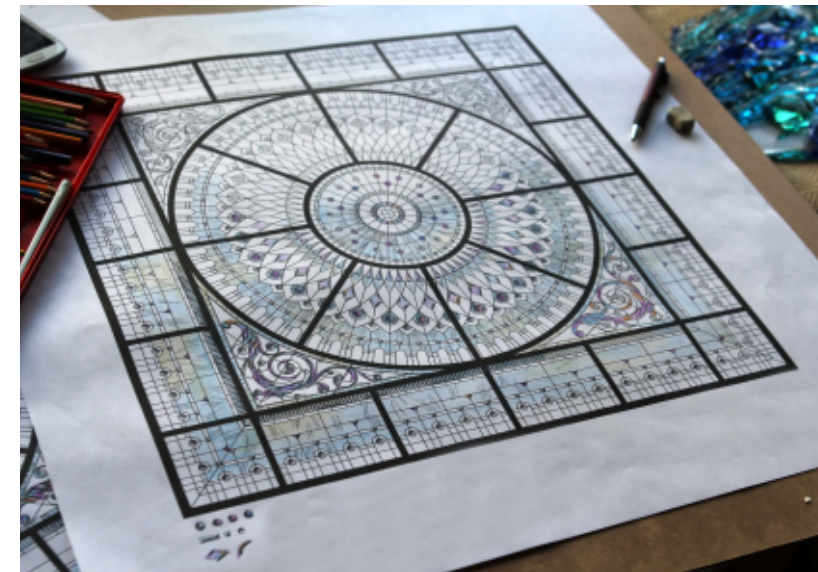

METAL FORMING

TIG / MIG Welding

NC Metal Profile Bending

Hydraulic section and pipe bending machine with NC provides the highest standard of accuracy and repeatability within the tolerance +/- 1/16".

SERVICES

Design Development

Throughout the initial discussion, style preferences, expectations, goals, and priorities are identified. With the artistic strong vision, the glass project concept is developed taking into account site-specific aspects of the property.

FABRICATION

From in-house complex steel frames fabrication to glass panels assembling and final glass finishing Art-N-Glass takes care of all aspects of the project development and fabrication

INSTALLATION

Glass packaging, delivery, and installation are important steps in any project completion. After full completion of glass projects at the studio, large frames are cut in pieces for delivery and reassembled using TIG welding at the construction site. Glass panels are installed at the end of construction project completion.

INTERNATIONAL ORDERS

Over the years Art-N-Glass scope has expanded to include various projects throughout the United States, Canada, Great Britain and the Caribbean.
